SUMMARY

Multi-asset investment professional with ~7 years across portfolio analytics, model governance, and investment platform delivery, targeting Director & Portfolio Manager, On Strategy Portfolio - Toronto. Holds delegated sign-off on valuation, sensitivity, and portfolio risk outputs for institutional portfolios of \$5-25bn per engagement at Moody's Analytics. Brings VaR/CVaR portfolio optimization and asset mix advisory from Ortec Finance, model governance committee membership, and delivery of all assigned client migrations onto the PFaroe PM portfolio management platform.

CORE SKILLS

Multi-Asset Portfolio Analytics & Risk Oversight • Portfolio Optimization (VaR / CVaR, Surplus) • Asset Mix & Allocation Analysis (SAA / TAA) • Model Governance & Independent Review • Investment Risk Management & Governance Controls • Cash Flow Projection & Liquidity Analytics • Investment Platform Migration (Calypso to PFaroe PM) • Python, SQL & Process Automation • Cross-Functional Leadership & Mentorship

EXPERIENCE

Moody's Analytics

Asst. Director - Modelling Services

Toronto, May 2023 - Present

Portfolio Analytics Oversight & Model Governance

- Held delegated sign-off authority on valuation, sensitivity, and portfolio-level outputs for multi-asset institutional client portfolios of \$5-25bn per engagement (~\$50bn+ cumulative), independently reviewing curve construction, spread calibration, and cross-asset interactions before production release.
- Served on the model governance committee, contributing to methodology review, documentation and benchmarking standards, and model-performance assessment for client-delivered portfolio analytics.
- Validated derivatives pricing outputs across rates, FX, and inflation, confirming sensitivity consistency at portfolio-aggregate level.

Process Controls, Risk Management & Escalation

- Escalated outputs lacking mathematical or economic defensibility and acted as escalation point for client-critical analytical issues, interfacing directly with clients' Heads of Risk and investment stakeholders.
- Re-engineered manual spreadsheet workflows into scalable Python analytics pipelines with embedded logging, validation, and auditability controls, supporting model-governance audit requirements.

Operational & Technology Change Delivery

- Led design and implementation of an enterprise multi-asset cash flow projection engine covering base, stress, and reverse-stress scenarios, delivering forward-looking visibility across portfolio horizons.
- Architected configurable time-bucketed liquidity gap analytics (T+1 through multi-year) supporting funding optimization, refinancing-risk assessment, and asset-allocation decisions.
- Built agentic AI development workflows (Claude Code, Cursor IDE) automating code generation, validation scaffolding, and anomaly detection, driving process improvement that cut development cycle time an estimated 30-40% on comparable modules.

Centre of Investment Expertise

- Prepared analytical summaries for senior stakeholders on interest-rate exposure, scenario impacts, and balance-sheet sensitivities, translating quantitative outputs into investment-committee-ready narratives.

Client Service Specialist

Toronto, May 2022 - May 2023

- Led onboarding and implementation for U.S. and Canadian pension funds, asset managers, and consulting firms adopting PFaroe DB (risk & ALM analytics) and PFaroe PM (portfolio management) platforms.
- Migrated all assigned client accounts from the legacy Calypso platform to PFaroe PM, validating model outputs post-deployment.

- Translated investment-team requirements into scoped Product Owner requests and advised clients on asset, liability, and portfolio configurations.

Ernst & Young (EY)

Senior Consultant - IFRS & Financial Risk Transformation

Toronto, Sep 2021 - Apr 2022

- Delivered IFRS 17 and IFRS 9 transformation projects for Canadian and international insurance clients, aligning regulatory requirements with system implementation and financial-reporting frameworks.
- Coordinated actuarial, finance, IT, risk, and program-management teams on milestone delivery, governance documentation, and regulatory-readiness processes.

Ortec Finance Canada

Consultant - Asset-Liability Management & Risk

Toronto, Feb 2019 - Sep 2021

- Performed asset-only and asset-liability (surplus) portfolio optimization on VaR and CVaR using Ortec's GLASS platform, with risk decomposition, contribution-to-risk budgeting, and near-optimal frontier analysis to test the robustness of allocation recommendations.
- Advised institutional clients on strategic and tactical asset mix trade-offs via stress testing and sensitivity analysis.
- Built and interpreted stochastic economic scenario generators assessing interest-rate risk and funding volatility under base-case and stressed market environments.
- Conducted liability-driven investment (LDI) analysis weighing return objectives, duration alignment, and liquidity considerations for pension-fund clients.
- Led the client onboarding and ALM study for a three-plan university pension merger, developing and validating the model as part of a three-person team - capturing all funding-policy dynamics and evaluating duration, currency, inflation, and leverage overlay strategies.
- Presented study findings and allocation recommendations on-site to investment committees at Canadian pension-fund clients.

EDUCATION & CREDENTIALS

- Chartered Financial Analyst (CFA) - CFA Institute, 2024
- MSc, Financial Modelling - Western University, 2018
- MSc, Chemical Engineering (Full Scholarship) - Western University, 2016
