Re: Director & Portfolio Manager, On Strategy Portfolio – Scotiabank

Dear Hiring Team,

I hold delegated sign-off authority on the valuation, sensitivity, and portfolio-risk outputs Moody's Analytics delivers to multi-asset institutional portfolios of \$5-25bn per engagement – the same discipline of rigorous model oversight, controls, and low tolerance for error that the On Strategy Portfolio Management team is built to provide at scale. I would like to be considered for the Director & Portfolio Manager, On Strategy Portfolio role.

On the portfolio side, my work at Ortec Finance included asset-only and asset-liability portfolio optimization on VaR and CVaR, risk decomposition and contribution-to-risk budgeting, and strategic and tactical asset mix advice presented directly to pension investment committees. At Moody's, I bring that same portfolio-level risk lens to duration and rate-shock analysis, derivatives sensitivity validation, and the aggregation logic that converts security-level exposures into portfolio-level risk metrics for institutional client books. On the operations and technology side, I migrated all of my assigned client accounts from a legacy Calypso environment onto the PFaroe PM portfolio management platform, acted as the liaison translating investment-team requirements into product and development work, and rebuilt spreadsheet-driven workflows into Python pipelines with logging, validation, and auditability controls. Agentic AI workflows I built have cut development cycle time an estimated 30-40% on comparable modules.

What draws me to this mandate is its scale-and-controls character: billions in assets, a high volume of accounts, and platform change that has to be embedded without introducing error. That is the environment I already work in, from a vendor seat. My leadership experience to date is project- and governance-based rather than large-span people management – I sit on Moody's model governance committee, serve as the escalation point for client-critical analytical issues, and led a three-person team through a university pension merger study – and I would bring that same structured rigor to developing this team, while treating the direct-report coaching and performance-management scope as a dimension I'd grow into deliberately. I am Toronto-based, hold the CFA charter and dual MSc degrees from Western University, and can start roughly four weeks after an offer. References available on request.

Sincerely,
