SUMMARY

Portfolio and market risk analytics specialist bringing ~7 years of institutional risk experience to ATB Financial's Managing Director, Portfolio Analysis and Strategic Initiatives mandate. Holds delegated sign-off at Moody's Analytics over valuation, sensitivity, and balance-sheet risk outputs for institutional portfolios of \$5-25bn per engagement, including portfolio-level risk aggregation review and senior-stakeholder risk commentary. Designed an enterprise multi-scenario stress and cash flow projection engine, ran VaR/CVaR portfolio optimization and risk decomposition at Ortec Finance, and replaced manual spreadsheet workflows with Python pipelines. CFA charterholder, dual MSc, model governance committee member.

CORE SKILLS

Institutional Portfolio & Market Risk Analytics • Portfolio Risk Aggregation & Reporting • Stress Testing & Scenario Design • VaR / CVaR & Risk Decomposition • Banking Book Interest-Rate & Balance Sheet Risk • Derivatives Pricing Validation & Sensitivity Review • Model Governance, Review & Challenge • Python, SQL & Risk Data Pipelines • Executive & Committee-Level Risk Communication

EXPERIENCE

Moody's Analytics

Asst. Director, Modelling Services (Investment & ALM Risk)

Toronto, May 2023 - Present

Top-of-House Portfolio Analysis & Executive Reporting

- Hold delegated sign-off authority on valuation, sensitivity, and balance sheet risk outputs for multi-asset institutional portfolios of \$5-25bn per engagement (~\$50bn+ cumulative), independently reviewing curve construction, spread calibration, and cross-asset interactions before production release.
- Review aggregation logic converting security-level exposures into portfolio-level risk metrics feeding downstream ALM and capital processes.
- Produce analytical summaries and risk reporting for senior stakeholders covering interest-rate exposure, scenario impacts, and balance sheet sensitivities, translating quantitative output into committee-ready commentary.

Stress Testing, Scenario Design & Market Risk Analysis

- Led design and implementation of an enterprise multi-asset cash flow projection engine supporting base, stress, and reverse-stress scenario analysis across multi-year horizons.
- Architected configurable time-bucketed liquidity gap analytics (T+1 through multi-year) enabling funding optimization, refinancing risk assessment, and asset-allocation decisions.
- Oversee interest-rate and duration analysis under parallel and non-parallel rate shocks across banking book exposures, aligned with IRRBB standards analogous to Basel / OSFI B-12, and embed behavioral cash flow, prepayment, and macro stress overlays.

Risk Infrastructure, Data Pipelines & Governance

- Validate derivatives pricing outputs across rates, FX, and inflation, cross-checking sensitivity consistency at portfolio-level ALM aggregates and escalating outputs lacking economic defensibility.
- Re-engineered manual spreadsheet workflows into scalable Python analytics pipelines with embedded logging, validation, and auditability controls.
- Serve on the model governance committee, contributing to methodology review, benchmarking and documentation standards, and model-performance assessment for client-delivered analytics.
- Built agentic AI development workflows (Claude Code, Cursor IDE) automating code generation, validation scaffolding, and anomaly detection, cutting development cycle time an estimated 30-40% on comparable modules.

Client Service Specialist

Toronto, May 2022 - May 2023

- Led onboarding and implementation for U.S. and Canadian pension funds, asset managers, and consulting firms migrating to the PFaroe DB (risk & ALM analytics) and PFaroe PM (portfolio management) platforms.
- Acted as technical liaison between client investment teams and product/development functions, scoping requirements into development requests, validating model outputs post-deployment, and migrating all assigned accounts off the legacy Calypso environment.

Ernst & Young (EY)

Senior Consultant, IFRS & Financial Risk Transformation

Toronto, Sep 2021 - Apr 2022

- Delivered IFRS 17 and IFRS 9 regulatory transformation projects for Canadian and international insurers, aligning regulatory requirements with system implementation and financial reporting frameworks.
- Coordinated actuarial, finance, IT, risk, and program-management functions on milestone delivery, governance documentation, and regulatory-readiness processes.

Ortec Finance Canada

Consultant, Asset-Liability Management & Risk

Toronto, Feb 2019 - Sep 2021

- Performed asset-only and asset-liability (surplus) portfolio optimization on VaR and CVaR using Ortec's GLASS platform, with risk decomposition, contribution-to-risk budgeting, and near-optimal frontier analysis to test allocation robustness.
- Built and interpreted stochastic economic scenario generators quantifying interest-rate risk and funding volatility under base-case and stressed environments.
- Delivered ALM studies for Canadian and international pension funds and institutional investors, analyzing funding ratios, duration mismatch, and long-term balance sheet risk exposures.
- Conducted cash flow, liquidity, and hedging analysis across interest-rate, inflation, and currency risk for international institutional clients.
- Presented portfolio analysis and stress-test findings to pension-fund investment committees on-site, including a three-plan university pension merger where a team of three developed and validated the funding-policy model.

EDUCATION & CREDENTIALS

- Chartered Financial Analyst (CFA) - CFA Institute, 2024
- MSc, Financial Modelling - Western University, 2018
- MSc, Chemical Engineering (Full Scholarship) - Western University, 2016
