Re: ALM Director, Consultant – Aon

Dear Hiring Team,

For the past four years at Moody's Analytics I have delivered, configured, and validated the multi-asset ALM analytics platform that institutional clients run their balance-sheet decisions on: onboarding U.S. and Canadian pension funds, asset managers, and consulting firms onto PFaroe DB and PFaroe PM, and moving every assigned account off a legacy Calypso environment. That onboarding, configuration, and troubleshooting motion closely mirrors what PathWise migrations demand, and it is why I am applying for the ALM Director, Consultant role in Global Life Risk Modelling.

On the development side, I led the design and implementation of an enterprise multi-asset cash flow projection engine supporting base, stress, and reverse-stress scenarios, with configurable time-bucketed liquidity gap analytics and embedded behavioural cash flow assumptions. I hold delegated sign-off authority on valuation, sensitivity, and ALM outputs for portfolios of \$5-25bn per engagement, reviewing curve construction, spread calibration, and duration positioning under parallel and non-parallel rate shocks before release, and I sit on the model governance committee. Earlier, at Ortec Finance, I ran asset-only and surplus portfolio optimization on VaR and CVaR through the GLASS platform, built stochastic economic scenario generators, modelled pension-fund actuarial liabilities, and advised pension investment committees on strategic asset allocation, LDI, and duration, inflation, and currency overlay strategies.

My insurance grounding comes from IFRS 17 and IFRS 9 transformation delivery at EY, where I aligned actuarial, finance, and IT functions on reporting-basis mechanics for Canadian and international insurers. I have not sat inside a Bermuda BSCR/EBS reporting cycle, and my ALM depth to date has centered on pension and multi-asset institutional mandates rather than life-insurance balance sheets; what I bring is the ALM, optimization, and stochastic-projection machinery underneath it, plus a demonstrated record of absorbing an unfamiliar regulatory reporting basis quickly and building production processes around it.

Aon Life Solutions is one of the few places where platform delivery, stochastic ALM modelling, and client advisory sit in the same seat, which is the combination I have spent seven years assembling. I am Toronto-based, available to interview immediately, and can start roughly four weeks after offer acceptance. References available on request.

Sincerely,
