SUMMARY

Investment risk and valuation specialist with ~7 years of experience in independent model challenge, scenario and sensitivity analysis, and valuation review - directly relevant to the Director, Investment Risk and Equity Valuation mandate at Canada Infrastructure Bank. Holds delegated sign-off authority at Moody's Analytics over valuation and sensitivity outputs for multi-asset (fixed income and derivative) institutional portfolios of \$5-25bn per engagement, and sits on the model governance committee setting methodology and documentation standards. Earlier ALM, LDI and VaR/CVaR portfolio-optimization advisory at Ortec Finance, including investment-committee delivery. CFA charterholder; dual MSc degrees; conversational French.

CORE SKILLS

Valuation Review & Delegated Sign-Off • Independent Challenge & Model Review • Discounted Cash Flow (DCF) Fundamentals & Discount Rate/Curve Assumption Review • Scenario Analysis & Sensitivity Testing • Stochastic Scenario Modelling & Outcome-Distribution Analysis • Financial Model Build & Review (Excel, Python) • Valuation Methodology & Documentation Standards • Portfolio Risk Analytics (VaR / CVaR / Attribution) • Investment Committee & Executive Reporting

EXPERIENCE

Moody's Analytics

Asst. Director - Modelling Services

Toronto, May 2023 - Present

Valuation Review & Independent Challenge

- Hold delegated sign-off authority over valuation, sensitivity and ALM outputs for multi-asset institutional portfolios of \$5-25bn per engagement (~\$50bn+ cumulative across the book), spanning fixed income and derivative exposures.
- Challenge key valuation inputs prior to production release - discount rates and curve assumptions implied by yield-curve construction, spread calibration and cross-asset interactions - and escalate outputs lacking mathematical or economic defensibility.
- Validate derivatives valuation outputs across rates, FX and inflation, confirming sensitivity consistency at portfolio-level aggregates and reviewing aggregation logic from security-level exposures to portfolio risk metrics.
- Serve as escalation point for client-critical analytical issues, working directly with clients' Heads of Risk and investment stakeholders.

Valuation Methodology, Governance & Documentation

- Contribute to methodology review, documentation and benchmarking standards as a member of the model governance committee, including model-performance assessment for client-delivered analytics.
- Re-engineered manual spreadsheet workflows into auditable Python analytics pipelines with embedded logging and validation controls, supporting documentation and reproducibility standards for recurring model review.

Scenario Analysis, Sensitivity Testing & Cash Flow Modelling

- Led design and implementation of an enterprise multi-asset cash flow projection engine supporting base, stress and reverse-stress scenarios, providing forward-looking visibility over long-horizon projected cash flows.
- Embedded behavioural cash flow assumptions, prepayment logic and macro stress overlays, and ran independent scenario analysis and sensitivity testing of portfolio exposure under parallel and non-parallel rate shocks.

Reporting & Mentorship

- Prepared analytical summaries for senior stakeholders on scenario impacts, valuation sensitivities and exposure, translating complex analytical outputs into concise, decision-ready narratives; mentored junior colleagues on review practice.

Client Service Specialist

Toronto, May 2022 - May 2023

- Led onboarding and implementation for U.S. and Canadian pension funds, asset managers and consulting firms on the PFaroe DB (risk & ALM analytics) and PFaroe PM (portfolio management) platforms - advising on asset, liability and portfolio configurations and validating model outputs post-deployment.
- Translated investment-team requirements into scoped development requests and migrated all assigned client accounts from the legacy Calypso platform.

Ernst & Young (EY)

Senior Consultant - IFRS & Financial Risk Transformation

Toronto, Sep 2021 - Apr 2022

- Delivered IFRS 17 and IFRS 9 transformation projects for Canadian and international insurance clients, aligning measurement requirements with system implementation and financial-reporting frameworks.
- Advised actuarial, finance, IT and program-management functions, and contributed to governance documentation and regulatory-readiness processes for financial institutions.

Ortec Finance Canada

Consultant - Asset-Liability Management & Risk

Toronto, Feb 2019 - Sep 2021

- Performed asset-only and asset-liability (surplus) portfolio optimization on VaR and CVaR using Ortec's GLASS platform, with risk decomposition, contribution-to-risk analysis and near-optimal frontier testing of allocation robustness.
- Built and interpreted stochastic economic scenario generators, producing distributions of funding and return outcomes under base-case and stressed environments.
- Delivered ALM and investment studies for Canadian and international pension funds and institutional investors, analyzing funding ratios, duration mismatch and long-horizon balance-sheet risk.
- Conducted liability-driven investment (LDI) analysis plus cash flow, liquidity and hedging analysis across interest-rate, inflation and currency risk for international institutional clients.
- Led onboarding and the ALM study for a three-plan university pension merger - on a team of three building and validating the model capturing all Funding Policy dynamics and evaluating duration, currency, inflation and leverage overlay strategies.
- Presented study findings and allocation recommendations to pension-fund investment committees on-site, and designed stochastic risk-management frameworks tailored to specific client mandates.

EDUCATION & CREDENTIALS

- Chartered Financial Analyst (CFA) - CFA Institute, 2024
- MSc, Financial Modelling - Western University, 2018
- MSc, Chemical Engineering (Full Scholarship) - Western University, 2016
- Languages: English (fluent) - French (conversational)
