Re: Director, Investment Risk and Equity Valuation – Canada Infrastructure Bank

Dear Hiring Team,

At Moody's Analytics I hold delegated sign-off authority over valuation and sensitivity outputs delivered to institutional portfolios of \$5-25bn per engagement - the independent-review seat the Director, Investment Risk and Equity Valuation role is built around. My mandate is to challenge before release: discount curves and rate assumptions implied by yield-curve construction, spread calibration, cross-asset assumptions and scenario outputs. On one client delivery the numbers passed every internal check but did not square economically under a specific rate shock; I held the release, decomposed the sensitivities, found a curve-calibration edge case, and escalated to the client's Head of Risk rather than sign.

I also sit on Moody's model governance committee, where methodology review, documentation and benchmarking standards are set - work analogous to CIB's push for standardized valuation methodologies, playbooks and model review practices. On the analytics side, I led the design of a multi-asset cash flow projection engine covering base, stress and reverse-stress scenarios. Earlier, at Ortec Finance, I built stochastic economic scenario generators producing distributions of funding and return outcomes, ran VaR and CVaR surplus optimization with risk decomposition and near-optimal frontier testing, and presented recommendations directly to pension investment committees. Mentoring junior colleagues on review practice has been part of my current role.

What draws me to CIB is the analytical honesty this mandate demands: revenue-risk and upside-sharing structures where the valuation answer rests on assumptions that must be argued, not asserted. My valuation depth has been built on long-dated, cash-flow-driven institutional portfolios rather than single-asset infrastructure equity - but the discipline is the one I practise daily: interrogating discount and stress assumptions, cash flow forecasts, and downside scenarios, then documenting the judgment so a governance forum can rely on it. I hold the CFA charter, dual MSc degrees from Western University, and conversational French.

I am Toronto-based, available for interviews immediately, and can start approximately four weeks after offer acceptance. Thank you for your consideration.

Sincerely,
