SUMMARY

Investment analytics professional with ~7 years across multi-asset portfolio analytics, ALM, and AI-enabled platform delivery for pension and institutional investors. At Moody's Analytics holds delegated sign-off on valuation, risk, and ALM outputs for portfolios of \$5-25bn per engagement, and led design of a cross-asset cash flow, liquidity, and scenario engine. Ex-Ortec Finance ALM consultant to Canadian pensions (VaR/CVaR optimization, portfolio construction, LDI). Familiar with Total Fund analytics needs across leverage, liquidity, and cross-asset exposures. CFA + dual MSc.

CORE SKILLS

Multi-asset portfolio analytics & scenario analysis • ALM, liquidity gap & cash flow projection modelling • Risk analytics: VaR/CVaR, risk decomposition & attribution • Cross-asset exposure aggregation & sensitivity analysis • Portfolio construction analytics: asset-only & asset-liability optimization • Model governance, validation & escalation frameworks • AI-assisted development & agentic workflows (Claude Code, Cursor) • Python (pandas, NumPy, SciPy), SQL & production analytics pipelines • Stakeholder partnership with investment committees, Heads of Risk & CIO offices

PROFESSIONAL EXPERIENCE

Moody's Analytics

Assistant Director - Modelling Services (Investment & ALM Analytics Lead) | Toronto, May 2023 - Present

Investment Analytics & Portfolio Insight

- Hold delegated sign-off authority on valuation, sensitivity, and ALM outputs delivered to multi-asset institutional client portfolios ranging \$5-25bn per engagement (~\$50bn+ cumulative book), spanning pensions, asset managers, and insurers.
- Review and validate aggregation logic converting security-level exposures into portfolio-level risk metrics – covering duration, cross-asset exposures, and scenario impacts – feeding downstream ALM, Total Fund reporting, and investment-committee narratives.
- Validate derivatives pricing outputs across rates, FX, and inflation; ensure consistency of sensitivities and stress impacts at portfolio-level ALM aggregates for client investment committees.

Analytics Platform Development & Scenario Engineering

- Led design and implementation of an enterprise multi-asset cash flow projection engine supporting base, stress, and reverse-stress scenarios – delivering forward-looking liquidity and funding visibility across ALM horizons.
- Architected configurable time-bucketed liquidity gap analytics (T+1 through multi-year), enabling funding optimization, refinancing risk assessment, and asset-allocation decisions; embedded behavioral cash flow assumptions, prepayment logic, and macro stress overlays.
- Re-engineered manual spreadsheet workflows into scalable, auditable Python analytics pipelines with embedded logging and validation controls.
- Built agentic AI development workflows (Claude Code, Cursor IDE) – automated code generation, validation scaffolding, and anomaly detection – reducing development cycle time an estimated 30-40% on comparable modules.

Model Governance & Stakeholder Partnership

- Operate within Moody's formal model governance framework – independently review curve construction, spread calibration, cross-asset interactions, and stress behaviour prior to production release; establish documentation and validation standards consistent with industry model-risk-management expectations.
- Serve as escalation point for client-critical analytical issues; interface directly with Heads of Risk and CIO-office stakeholders, translating quantitative outputs into investment-committee-ready narratives.
- Translate client investment-team requirements into structured Product Owner development requests; coordinate across product, engineering, and QA functions in cross-functional squad delivery and validate outputs post-deployment.

Client Service Specialist - PFaroe Platform | Toronto, May 2022 - May 2023

- Led onboarding and implementation for U.S. and Canadian pension funds, asset managers, and consulting firms migrating to the PFaroe multi-asset analytics platform; translated investment-team requirements into Product Owner development requests.
- Successfully migrated all assigned client accounts from the legacy Calypso platform to PFaroe PM, validating asset, liability, and ALM configurations post-deployment.

Ernst & Young (EY)

Senior Consultant - IFRS & Financial Risk Transformation | Toronto, Sep 2021 - Apr 2022

- Delivered IFRS 17 and IFRS 9 technology-transformation projects for Canadian and international insurance clients – aligned regulatory requirements with system implementation and financial-reporting frameworks.
- Coordinated across actuarial, finance, IT, risk, and program management on milestone delivery, governance documentation, and regulatory-readiness materials.

Ortec Finance Canada

Consultant - Asset-Liability Management & Risk | Toronto, Feb 2019 - Sep 2021

- Delivered ALM studies for Canadian and international pension funds and institutional investors – analyzed funding ratios, duration mismatch, and long-term balance-sheet risk under stochastic economic scenarios.
- Performed asset-only and asset-liability (surplus) portfolio construction and optimization based on VaR and CVaR using Ortec's GLASS platform; conducted risk decomposition, contribution-to-risk, and near-optimal frontier analysis to test allocation robustness.
- Conducted liability-driven investment (LDI) analysis – trade-offs between return objectives, duration alignment, leverage overlays, and liquidity for pension-fund clients; advised on Strategic and Tactical Asset Allocation via stress testing and sensitivity analysis across cross-asset exposures.
- Built and interpreted stochastic economic scenario generators assessing interest-rate, inflation, and currency risk; performed cross-asset hedging analysis for international institutional clients.
- Led the ALM study for a three-plan university pension merger (new jointly-sponsored plan, analogous to a Total Fund build) – on a team of three, developed and validated the model capturing all Funding Policy dynamics and evaluated duration, inflation, currency, and leverage overlay strategies.
- Presented ALM study findings to investment committees at Canadian pension-fund clients on-site.

EDUCATION & CREDENTIALS

- Chartered Financial Analyst (CFA) – CFA Institute, 2024
- MSc, Financial Modelling – Western University, 2018
- MSc, Chemical Engineering (Full Scholarship) – Western University, 2016
