Re: Director, Total Fund Management Investment Analytics – Ontario Teachers' Pension Plan

Dear Hiring Team,

I build and sign off on the multi-asset analytics that institutional investment teams rely on to see their fund clearly. At Moody's Analytics I hold delegated sign-off on valuation, sensitivity, and ALM outputs for portfolios of \$5-25bn per engagement, and I led the design of an enterprise cross-asset cash flow, liquidity, and scenario engine that gives pension and asset-manager clients forward-looking visibility on funding, cross-asset exposures, and balance-sheet risk. I am applying for the Director, Total Fund Management Investment Analytics role at Ontario Teachers'.

The analytical mandate here maps directly onto what I have been building. I led the design and delivery of a multi-scenario cash flow projection engine with configurable liquidity gap analytics from T+1 through multi-year horizons; I review and validate derivatives sensitivities across rates, FX, and inflation at portfolio-level aggregates; and I have deployed agentic AI development workflows – Claude Code and Cursor – that measurably accelerated model development and validation cycle times in my team by an estimated 30-40%. I translate client investment-team requirements into structured product and engineering deliverables within a cross-functional squad model, and I serve as the escalation point for Heads of Risk and CIO-office stakeholders on client-critical analytics. Before Moody's, I spent two and a half years at Ortec Finance delivering ALM studies, VaR/CVaR portfolio optimization, LDI, and stochastic scenario work for Canadian pension funds – including the ALM study for the University Pension Plan merger – so the Total Fund vocabulary of funded status, duration mismatch, leverage overlays, and liquidity management is native to me.

Ontario Teachers' is where Canadian Total Fund management is defined, and the combination of advanced analytics, AI platform capability, and model governance discipline this role requires is the combination I have been developing across four years at Moody's and two and a half at Ortec. I hold the CFA charter and dual MSc degrees from Western University, am Toronto-based, and can interview immediately.

Sincerely,
