SUMMARY

Senior Manager / ALM Risk candidate with ~7 years across IRRBB analytics, balance-sheet risk oversight, and model governance. At Moody's Analytics, holds delegated sign-off authority on ALM and sensitivity outputs for multi-asset institutional portfolios (\$5-25bn per engagement). Hands-on with interest-rate risk analytics – including Economic Value of Equity and Net Interest Income sensitivities – under parallel and non-parallel rate shocks, cash-flow projection engines, and senior-stakeholder risk reporting. CFA charterholder; dual MSc (Financial Modelling, Engineering); Python and SQL fluent.

CORE SKILLS

IRRBB / Interest-Rate Risk Analytics • Balance Sheet & ALM Oversight • Economic Value of Equity (EVE) & NII Sensitivity • OSFI B-12 / Basel IRRBB (applied knowledge) • Stress Testing & Scenario Analysis • Risk Appetite & Limits Frameworks (applied knowledge) • Yield Curve & Rate Shock Analytics • Model Governance & Delegated Sign-Off • Python, SQL, Advanced Excel • Senior Stakeholder & Risk Committee Reporting

PROFESSIONAL EXPERIENCE

Moody's Analytics

Asst. Director - Modelling Services | Toronto, May 2023 – Present

IRRBB, ALM & Balance-Sheet Risk

- Hold delegated sign-off authority on valuation, sensitivity, and ALM outputs for multi-asset institutional portfolios (\$5-25bn per engagement; ~\$50bn+ cumulative), independently reviewing curve construction, spread calibration, and cross-asset interactions prior to production release.
- Oversee interest-rate risk and duration analysis under parallel and non-parallel rate shocks, aligned with IRRBB standards analogous to OSFI B-12 and Basel Committee frameworks; review Economic Value of Equity (EVE) and Net Interest Income (NII) sensitivity outputs at portfolio-level ALM aggregates.
- Validate derivatives pricing outputs across rates, FX, and inflation, ensuring consistency of sensitivities and scenario impacts at portfolio-level ALM aggregates feeding downstream capital processes.
- Review aggregation logic converting security-level exposures into portfolio-level risk metrics; escalate outputs lacking mathematical or economic defensibility to product owners and clients' Heads of Risk.

Cash Flow, Liquidity & Stress Analytics

- Led design and implementation of an enterprise multi-asset cash-flow projection engine supporting base, stress, and reverse-stress scenarios, delivering forward-looking balance-sheet visibility across ALM horizons.
- Architected configurable time-bucketed liquidity gap analytics (T+1 through multi-year) enabling funding optimization, refinancing risk assessment, and asset-allocation decisions.
- Embedded behavioral cash-flow assumptions, prepayment logic, and macro stress overlays aligned with regulatory liquidity expectations.

Reporting, Tooling & Stakeholder Engagement

- Prepare analytical summaries for senior stakeholders covering interest-rate exposure, scenario impacts, and balance-sheet sensitivities, translating quantitative outputs into committee-ready narratives.
- Re-engineered manual spreadsheet workflows into scalable, auditable Python analytics pipelines with embedded logging and validation controls.
- Mentor junior colleagues on ALM concepts, curve mechanics, and sensitivity interpretation; serve as escalation point for client-critical analytical issues.

Client Service Specialist - Buy-Side Solutions | Toronto, May 2022 – May 2023

- Led onboarding and implementation for U.S. and Canadian pension funds, asset managers, and consulting firms migrating to the PFaroe analytics platform; advised on asset, liability, and ALM configurations and validated model outputs post-deployment.
- Served as technical liaison between client investment teams and product owners, scoping requirements into development requests; supported full migration of all assigned accounts from a legacy Calypso environment.

Ernst & Young (EY)

Senior Consultant - IFRS & Financial Risk Transformation | Toronto, Sep 2021 – Apr 2022

- Delivered IFRS 17 and IFRS 9 technology-transformation projects for Canadian and international insurance clients, aligning regulatory requirements with system implementation and financial-reporting frameworks.
- Advised actuarial, IT, finance, and program-management functions on IFRS 17 / IFRS 9 adoption; contributed to governance documentation and regulatory-readiness processes.

Ortec Finance Canada

Consultant - Asset-Liability Management & Risk | Toronto, Feb 2019 – Sep 2021

- Delivered ALM studies for Canadian and international pension funds and institutional investors, analyzing funding ratios, duration mismatch, and long-term balance-sheet risk exposures.
- Built and interpreted stochastic economic scenario generators assessing interest-rate risk and funding volatility under base-case and stressed environments.
- Conducted liability-driven investment (LDI), cash-flow, liquidity, and hedging analysis across interest-rate, inflation, and currency risk; advised clients on Strategic and Tactical Asset Allocation trade-offs through stress testing and sensitivity analysis.
- Led onboarding and the ALM study for the University Pension Plan (UPP) merger of three single-employer plans into a new jointly-sponsored plan – on a team of three developing and validating the model capturing funding-policy dynamics, duration, currency, inflation, and leverage overlay strategies.
- Presented ALM study findings to investment committees at Canadian pension-fund clients, translating technical analysis into governance-level recommendations.

EDUCATION & CREDENTIALS

- Chartered Financial Analyst (CFA) – CFA Institute, 2024
- MSc, Financial Modelling – Western University, 2018
- MSc, Chemical Engineering (Full Scholarship) – Western University, 2016
