SUMMARY

Candidate for the Analyst, Total Fund Management (12-Month Contract) role with ~7 years across institutional investment analytics, cash-flow and liquidity modelling, and output validation for multi-asset portfolios. At Moody's Analytics, validates valuation and sensitivity outputs for pension funds, asset managers, and bank treasuries; investigates and escalates discrepancies; and partners with technology teams on workflow enhancements. Strong Python and SQL; CFA charter; dual MSc; detail-oriented with a controls mindset.

CORE SKILLS

Output Validation & Discrepancy Investigation • Cash Flow & Liquidity Analytics • Trade Lifecycle Familiarity (Rates, FX, Inflation Derivatives) • Front-to-Back Workflow Support • Operational Controls & Issue Escalation • Requirements Scoping with Technology Teams • Python & SQL (Large Datasets) • Stochastic Scenario & Stress Analysis • CFA Charterholder

EXPERIENCE

Moody's Analytics

Asst. Director - Modelling Services | Toronto, May 2023 - Present

Output Validation & PnL/Sensitivity Reconciliation

- Holds sign-off authority on valuation, sensitivity, and ALM outputs delivered to institutional client portfolios ranging \$5-25bn per engagement – independently reviews curve construction, spread calibration, and cross-asset interactions, and validates outputs against internal records prior to production release.
- Validates derivatives pricing outputs across rates, FX, and inflation – cross-checks sensitivity consistency at portfolio-level aggregates and flags discrepancies before release.
- Reviews aggregation logic converting security-level exposures into portfolio-level risk metrics, ensuring accuracy of downstream investment and risk reporting.

Cash Flow, Liquidity & Reporting

- Led design and implementation of an enterprise multi-asset cash flow projection engine supporting base, stress, and reverse-stress scenarios – delivering forward-looking liquidity visibility across investment horizons.
- Architected configurable time-bucketed liquidity gap analytics (T+1 through multi-year) supporting funding and asset-allocation decisions.
- Prepares analytical summaries for senior stakeholders covering rate exposure, scenario impacts, and balance-sheet sensitivities.

Technology Coordination & Issue Resolution

- Serves as escalation point for client-critical analytical issues – investigates discrepancies, coordinates with downstream technology and operations partners, and drives timely resolution.
- Re-engineered manual spreadsheet workflows into auditable Python analytics pipelines with embedded logging and validation controls, strengthening operational integrity.
- Built agentic AI development workflows (Claude Code, Cursor IDE) automating code generation and anomaly detection – reducing development cycle time an estimated 30-40% on comparable modules.

Client Service Specialist - PFaroe Platform | Toronto, May 2022 - May 2023

- Led onboarding and implementation for U.S. and Canadian pension funds and asset managers migrating to the PFaroe analytics platform – translated investment-team requirements into structured Product Owner requests and tracked delivery.
- Served as technical liaison between front-office users and product/development teams; validated model outputs post-deployment, investigated configuration breaks, and resolved issues with internal technology partners.
- Migrated all assigned client accounts from the legacy Calypso environment to PFaroe PM – coordinated testing and sign-off across stakeholders.

Ernst & Young (EY)

Senior Consultant - IFRS & Financial Risk Transformation | Toronto, Sep 2021 - Apr 2022

- Delivered IFRS 17 and IFRS 9 technology-transformation projects for Canadian and international insurance clients, aligning regulatory reporting requirements with system implementation workflows.
- Coordinated across actuarial, finance, IT, and PM functions on milestone delivery – built shared requirements documentation and unblocked cross-team dependencies.

Ortec Finance Canada

Consultant - Asset-Liability Management & Risk | Toronto, Feb 2019 - Sep 2021

- Delivered ALM studies for Canadian and international pension funds and institutional investors – analyzed funding ratios, duration positioning, and long-horizon balance-sheet risk exposures.
- Built and interpreted stochastic economic scenario generators assessing interest-rate, inflation, and currency risk under base-case and stressed environments.
- Performed cash flow, liquidity, and hedging analysis across interest-rate, inflation, and currency risk for international institutional clients.
- Performed asset-only and asset-liability (surplus) portfolio optimization on VaR and CVaR using Ortec's GLASS platform – including risk decomposition and attribution.
- Presented ALM findings on-site to investment committees at Canadian pension-fund clients; led onboarding and the ALM study for the University Pension Plan (UPP) three-employer merger.

EDUCATION & CREDENTIALS

- Chartered Financial Analyst (CFA) - CFA Institute, 2024
- MSc, Financial Modelling - Western University, 2018
- MSc, Chemical Engineering (Full Scholarship) - Western University, 2016
