SUMMARY

Candidate for Senior Director, Asset and Liability Management (ALM) with ~7 years across institutional ALM analytics, IRRBB modelling, and balance-sheet risk. Holds delegated sign-off on valuation, sensitivity, and ALM outputs across multi-asset institutional portfolios (\$5-25bn per engagement; ~\$50bn cumulative) at Moody's Analytics, including parallel and non-parallel rate-shock analytics consistent with OSFI B-12 and Basel IRRBB frameworks. Designed an enterprise multi-scenario cash-flow and liquidity-gap engine supporting base, stress, and reverse-stress scenarios. Prior practitioner depth in stochastic ALM, LDI, and hedging analytics at Ortec Finance. CFA + dual MSc.

CORE SKILLS

Asset and Liability Management (ALM) • Interest Rate Risk – IRRBB / OSFI B-12 aligned • ALM Model Development & Governance • Balance Sheet & Liquidity Gap Analytics • Stress Testing & Scenario Analysis • Yield Curve, Duration & EVE/NII Sensitivity • Rates, FX & Inflation Derivatives Validation • Hedging Analysis (Interest Rate, Inflation, Currency) • Python (Advanced), SQL, Stochastic Modelling

EXPERIENCE

Moody's Analytics

Asst. Director – Modelling Services | Toronto, May 2023 – Present

Interest Rate Risk & Balance Sheet Analytics

- Hold delegated sign-off authority on valuation, sensitivity, and ALM outputs delivered to institutional client portfolios ranging \$5-25bn per engagement (~\$50bn cumulative) – independently reviewing curve construction, spread calibration, and cross-asset interactions prior to production release.
- Oversee interest-rate risk and duration analysis under parallel and non-parallel rate shocks, consistent with OSFI B-12 Interest Rate Risk Management Guideline and Basel IRRBB frameworks, including EVE and NII sensitivity at portfolio-level ALM aggregates.
- Validate rates, FX, and inflation derivatives outputs and cross-check sensitivity consistency at portfolio-level ALM aggregates feeding balance-sheet risk assessment.

ALM Model Development, Stress Testing & Liquidity

- Led design and implementation of an enterprise multi-asset cash-flow projection engine – a core ALM model supporting base, stress, and reverse-stress scenarios – delivering forward-looking liquidity visibility across ALM horizons.
- Architected configurable time-bucketed liquidity-gap analytics (T+1 through multi-year) enabling funding optimisation, refinancing-risk assessment, and asset-allocation decisions.
- Embedded behavioural cash-flow assumptions, prepayment logic, and macro stress overlays aligned with regulatory liquidity expectations and executive contingency planning.

Model Governance, Reporting & Continuous Improvement

- Operate within a formal model-governance framework – review ALM model assumptions, escalate outputs lacking mathematical or economic defensibility, and serve as escalation point for client-critical analytical issues, interfacing with Heads of Risk and senior stakeholders.
- Prepare ALM analytical summaries, dashboards, and committee-ready presentations on interest-rate exposure, scenario impacts, and balance-sheet sensitivities.
- Re-engineered manual spreadsheet workflows into auditable Python analytics pipelines; deployed agentic AI development workflows (Claude Code, Cursor) reducing development cycle time approximately 30-40% on comparable modules.

Client Service Specialist | Toronto, May 2022 – May 2023

- Led onboarding and implementation for U.S. and Canadian pension funds, asset managers, and consulting firms migrating to the PFaroe analytics platform – advising on asset, liability, and ALM configurations and validating model outputs post-deployment.

- Translated investment-team requirements into structured product/development requests; successfully migrated all assigned client accounts from a legacy Calypso environment.

Ernst & Young (EY)

Senior Consultant – IFRS & Financial Risk Transformation | *Toronto, Sep 2021 – Apr 2022*

- Delivered IFRS 17 and IFRS 9 technology-transformation projects for Canadian and international insurance clients – aligned regulatory requirements with system implementation and balance-sheet reporting frameworks.
- Advised actuarial, finance, IT, and program-management functions on governance documentation and regulatory-readiness processes; coordinated milestone delivery across cross-functional teams.

Ortec Finance Canada

Consultant – Asset-Liability Management & Risk | *Toronto, Feb 2019 – Sep 2021*

- Delivered ALM studies for Canadian and international pension funds and institutional investors – analysed funding ratios, duration mismatch, and long-term balance-sheet risk exposures.
- Built and interpreted stochastic economic scenario generators assessing interest-rate risk and funding volatility under base-case and stressed environments.
- Performed cash-flow, liquidity, and hedging analysis across interest-rate, inflation, and currency risk; advised clients on Strategic and Tactical Asset Allocation trade-offs via stress testing and sensitivity analysis.
- Performed asset-only and asset-liability (surplus) portfolio optimisation on VaR and CVaR via Ortec's GLASS platform; presented findings at client investment-committee meetings on-site.

EDUCATION & CREDENTIALS

- Chartered Financial Analyst (CFA) – CFA Institute, 2024
- MSc, Financial Modelling – Western University, 2018
- MSc, Chemical Engineering (Full Scholarship) – Western University, 2016
