SUMMARY

Analyst, Global Asset Liability Management candidate with ~7 years across institutional ALM, interest-rate risk, and balance-sheet analytics at Moody's Analytics, EY, and Ortec Finance. CFA charterholder with dual MSc credentials and delegated sign-off on valuation, sensitivity, and ALM outputs for multi-asset institutional portfolios (\$5-25bn per engagement). Hands-on with duration-gap analytics, VaR/CVaR, fixed-income and derivatives sensitivity, IFRS 17/IFRS 9 transformation, and liability-driven investment strategies for pensions and insurers.

CORE SKILLS

Asset Liability Management (ALM) • Interest Rate Risk & Duration Gap • Fixed Income & Derivatives Analytics • Liability-Driven Investment (LDI) & Hedging • VaR / CVaR & Scenario Analysis • IFRS 17 & IFRS 9 • Stochastic Modelling & Monte Carlo • Python & Excel (Advanced) • Senior Stakeholder Reporting & Communication

EXPERIENCE

Moody's Analytics

Asst. Director – Modelling Services (Investment & ALM Risk) | Toronto, May 2023 – Present

ALM Risk Metrics & Senior Management Reporting

- Hold delegated sign-off on valuation, sensitivity, and ALM outputs delivered to multi-asset institutional portfolios ranging \$5-25bn per engagement (~\$50bn+ cumulative book of work).
- Analyze and explain movement in duration gap, earnings risk, and VaR-style sensitivities under parallel and non-parallel interest-rate shocks; prepare updated risk-position summaries and market-driven gain/loss commentary for senior stakeholders.
- Validate derivatives pricing outputs (rates, FX, inflation) and cross-check sensitivity consistency at portfolio-level ALM aggregates; escalate outputs lacking mathematical or economic defensibility.

ALM Systems, Process Improvement & Forecasting

- Led design and implementation of an enterprise multi-asset cash-flow projection engine supporting base, stress, and reverse-stress scenarios, improving forward-looking interest-rate and liquidity visibility across ALM horizons.
- Architected configurable time-bucketed liquidity gap analytics (T+1 to multi-year) supporting refinancing, funding, and asset-allocation decisions; embedded behavioural cash-flow assumptions, prepayment logic, and macro stress overlays.
- Re-engineered manual spreadsheet workflows into auditable Python analytics pipelines with embedded logging and validation controls.

Cross-Functional Engagement & Business-Driven Issues

- Interface with clients' Heads of Risk and investment stakeholders on emerging analytical issues – including new-business impacts, restructuring, and segmentation changes – translating business requirements into modelling and reporting changes.
- Operate within a formal model-governance framework: independently review curve construction, spread calibration, and cross-asset interactions prior to production release; document assumptions to auditability standards.

Client Service Specialist – PFaroe ALM Platform | Toronto, May 2022 – May 2023

- Led onboarding and implementation for U.S. and Canadian pension funds, asset managers, and consulting firms migrating to the PFaroe ALM and portfolio analytics platform.
- Advised clients on asset, liability, and ALM configurations; validated model outputs post-deployment and migrated all assigned accounts from legacy Calypso to PFaroe PM.

Ernst & Young (EY)

Senior Consultant – IFRS & Financial Risk Transformation | Toronto, Sep 2021 – Apr 2022

- Delivered IFRS 17 and IFRS 9 technology-transformation projects for Canadian and international insurance clients; advised actuarial, finance, IT, and risk teams on adoption of the standards.

- Contributed to governance documentation and regulatory-readiness processes; coordinated milestone delivery across actuarial, finance, IT, risk, and program-management functions.

Ortec Finance Canada

Consultant – Asset-Liability Management & Risk | *Toronto, Feb 2019 – Sep 2021*

- Delivered ALM studies for Canadian and international pension funds and institutional investors; analyzed funding ratios, duration mismatch, and long-term balance-sheet risk under base and stressed regimes.
- Conducted liability-driven investment (LDI) analysis, balancing return objectives, duration alignment, and liquidity considerations; advised on Strategic and Tactical Asset Allocation via stress and sensitivity testing.
- Built and interpreted stochastic economic scenario generators; performed cash-flow, liquidity, and hedging analysis across interest-rate, inflation, and currency risk for institutional clients.
- Performed asset-only and asset-liability (surplus) portfolio optimization based on VaR and CVaR via Ortec's GLASS platform, with risk decomposition and contribution-to-risk attribution.
- Led onboarding and the ALM study for a three-plan university pension merger (new jointly-sponsored plan) – on a team of three, developed and validated a model capturing all Funding Policy dynamics and evaluated duration, currency, inflation, and leverage overlay strategies; presented findings to investment committees.

EDUCATION & CREDENTIALS

- Chartered Financial Analyst (CFA) – CFA Institute, 2024
- MSc, Financial Modelling – Western University, 2018
- MSc, Chemical Engineering (Full Scholarship) – Western University, 2016
