Re: Analyst, Global Asset Liability Management – Manulife

Dear Hiring Team,

At Moody's Analytics I currently hold delegated sign-off authority on valuation, sensitivity, and ALM outputs delivered to multi-asset institutional portfolios in the \$5-25bn range per engagement – the precise analytical discipline Manulife's Global ALM group is built around. I would like to be considered for the Analyst, Global Asset Liability Management role.

My day-to-day work maps directly onto the position's core responsibilities. I analyze and explain movement in duration gap, earnings risk, and VaR-style sensitivities under parallel and non-parallel rate shocks, and prepare updated risk-position summaries and market-driven gain/loss commentary for senior management – matching the forecasting and reporting accountability in this role. I led the design and implementation of an enterprise multi-asset cash-flow projection engine supporting base, stress, and reverse-stress scenarios, and re-engineered manual spreadsheet workflows into auditable Python pipelines – the kind of ALM systems and process-improvement ownership the role explicitly calls for. I also interface with Heads of Risk and investment stakeholders on emerging business issues – new mandates, restructuring, segmentation changes – translating their requirements into modelling and reporting changes, which aligns with the cross-functional partnership responsibilities described. At EY I delivered IFRS 17 and IFRS 9 transformation for Canadian and international insurers alongside actuarial, finance, and IT teams; at Ortec Finance I built stochastic scenario generators and LDI and hedging analytics for pension clients, including a three-plan university pension merger I co-led end-to-end and presented to the investment committee.

What draws me specifically to Manulife is the breadth of the General Fund – public and private bonds, mortgages, private equity, real estate, and infrastructure – and the central role Global ALM plays in shaping investment strategy and measuring IFRS 17 economic and accounting risk metrics across that book. That is the practitioner environment I want to be working in. I hold the CFA charter and dual MSc degrees from Western University.

I am Toronto-based, available for interviews immediately, and can start approximately four weeks after offer acceptance. References are available on request. Thank you for your consideration.

Sincerely,
