SUMMARY

ALM Risk Manager candidate with ~7 years across IRRBB analytics, market risk reporting, and model governance. At Moody's Analytics, holds delegated sign-off authority on valuation, sensitivity, and ALM outputs for multi-asset institutional portfolios (\$5-25bn per engagement). Runs interest-rate risk analytics under parallel and non-parallel rate shocks (analogous to EVE and NII frameworks); validates fixed income, IR derivatives, and FX pricing and cashflow profiles. Python and SQL practitioner. CFA + dual MSc.

CORE SKILLS

ALM & IRRBB Analytics • Interest Rate Risk (EVE/NII-analogous) • Stress Testing & Scenario Analysis • Fixed Income & IR Derivatives Valuation • Sensitivity Analysis & Curve Calibration • Python (Advanced) & SQL (Intermediate) • Risk Reporting Automation • Model Governance & Sign-Off Authority • Stakeholder Communication

EXPERIENCE

Moody's Analytics

Asst. Director - Modelling Services | Toronto, May 2023 - Present

IRRBB & Market Risk Analytics

- Hold delegated sign-off authority on valuation, sensitivity, and ALM outputs delivered to institutional client portfolios ranging \$5-25bn per engagement; independently review curve construction, spread calibration, and cross-asset interactions prior to production release.
- Oversee interest-rate risk and duration analysis under parallel and non-parallel rate shocks, aligned with IRRBB standards analogous to OSFI B-12 and Basel Committee frameworks – covering the EVE and NII sensitivity dimensions those frameworks require.
- Validate pricing and sensitivity outputs across fixed income, linear IR derivatives, and FX – reviewing cashflow profiles, discounting logic, and scenario impacts at portfolio-level ALM aggregates.

Risk Reporting Automation & Data Infrastructure

- Re-engineered manual spreadsheet workflows into scalable, auditable Python analytics pipelines with embedded logging, validation, and version control.
- Designed aggregation logic converting security-level exposures into consolidated portfolio-level risk metrics feeding scenario, sensitivity, and ALM reporting – directly analogous to building and maintaining enterprise banking-book position and risk-metric datasets.
- Deployed agentic AI development workflows (Claude Code, Cursor IDE) automating code generation, validation scaffolding, and anomaly detection – reducing development cycle time ~30-40% on comparable modules.

Stress Testing, Liquidity & Stakeholder Communication

- Led design of an enterprise multi-asset cash flow projection engine supporting base, stress, and reverse-stress scenarios; architected configurable time-bucketed liquidity gap analytics (T+1 through multi-year).
- Embedded behavioral cash flow assumptions, prepayment logic, and macro stress overlays aligned with regulatory liquidity expectations.
- Prepared analytical summaries for senior stakeholders on interest-rate exposure, scenario impacts, and balance-sheet sensitivities; serve as escalation point for client Heads of Risk on analytical issues.

Client Service Specialist | Toronto, May 2022 - May 2023

- Led onboarding and implementation for U.S. and Canadian pension funds, asset managers, and consulting firms migrating to the PFaroe analytics platform; advised on asset, liability, and ALM configurations and validated model outputs post-deployment.
- Translated investment-team requirements into structured development requests; contributed to the successful migration of all assigned client accounts from a legacy Calypso environment.

Ernst & Young (EY)

Senior Consultant - IFRS & Financial Risk Transformation | Toronto, Sep 2021 – Apr 2022

- Delivered IFRS 17 and IFRS 9 transformation projects for Canadian and international insurance clients; aligned regulatory requirements with system implementation and financial-reporting frameworks.
- Coordinated across actuarial, finance, IT, risk, and PM teams on milestone delivery, governance documentation, and regulatory-readiness processes.

Ortec Finance Canada

Consultant - Asset-Liability Management & Risk | Toronto, Feb 2019 – Sep 2021

- Delivered ALM studies for Canadian and international pension funds; analyzed funding ratios, duration mismatch, and long-term balance-sheet exposures across interest-rate, inflation, and FX risk.
- Built and interpreted stochastic economic scenario generators for stress testing interest-rate risk and funding volatility under base and stressed environments.
- Performed cash flow, liquidity, and hedging analysis (IR, inflation, currency) for international clients; modelled actuarial liabilities alongside fixed income, equity, and derivative product types.
- Conducted VaR and CVaR portfolio optimization, risk decomposition, and contribution-to-risk analytics on Ortec's GLASS platform; presented findings to investment committees at pension-fund clients.

EDUCATION & CREDENTIALS

- Chartered Financial Analyst (CFA) – CFA Institute, 2024
- MSc, Financial Modelling – Western University, 2018
- MSc, Chemical Engineering (Full Scholarship) – Western University, 2016
