SUMMARY

IRRBB and Asset Liability Management specialist with ~7 years across interest rate risk measurement, balance sheet analytics, and model governance. At Moody's Analytics, holds delegated sign-off on valuation, sensitivity, and ALM outputs for multi-asset institutional portfolios (\$5-25bn per engagement); led a multi-scenario cash flow projection engine and IRRBB-analogous analytics under parallel and non-parallel shocks, covering both economic-value (EVE) and earnings dimensions, applied in frameworks consistent with OSFI B-12 / BCBS 368. CFA charterholder with dual MSc; advisory background spans Treasury-facing institutional clients across banks, pension funds, and insurers.

CORE SKILLS

IRRBB Measurement (EVE & NII) • Asset Liability Management (ALM) • OSFI B-12 / BCBS 368 Awareness • Yield Curve & Spread Calibration • Behavioral Cash Flow Modelling (Prepayment, Prepayment Logic) • Cash Flow Projection & Liquidity Gap Analytics • Python & SQL Analytics Pipelines • ALCO-Style Reporting & Risk Attribution • Model Governance & Documentation

PROFESSIONAL EXPERIENCE

Moody's Analytics

Asst. Director – Modelling Services | Toronto, May 2023 – Present

IRRBB & Balance Sheet Risk Measurement

- Hold delegated sign-off authority on valuation, sensitivity, and ALM outputs delivered to multi-asset institutional client portfolios ranging \$5-25bn per engagement – independently review curve construction, spread calibration, and cross-asset interactions prior to production release.
- Review interest rate risk and duration analysis under parallel and non-parallel rate shocks, in frameworks consistent with OSFI B-12 and BCBS 368 – outputs cover economic-value (EVE) and earnings-based sensitivity dimensions analogous to bank Treasury IRRBB measurement.
- Validate derivatives pricing outputs across rates, FX, and inflation – verify consistency of sensitivities and scenario impacts at portfolio-level ALM aggregates feeding downstream balance sheet risk and capital processes.

Cash Flow Projection, Behavioral Assumptions & ETL Pipelines

- Led design and implementation of an enterprise multi-asset cash flow projection engine supporting base, stress, and reverse-stress scenarios – delivering forward-looking liquidity and earnings visibility across ALM horizons relevant to balance sheet and funding management.
- Architected configurable time-bucketed gap analytics (T+1 through multi-year) enabling funding optimization, refinancing risk assessment, and balance sheet management decisions.
- Embedded behavioral cash flow assumptions and prepayment logic, with macro stress overlays – covering the non-trading balance sheet behavioral mechanics relevant to IRRBB measurement.
- Re-engineered manual spreadsheet workflows into scalable, auditable Python and SQL extract/transform/load pipelines with embedded balance-and-control checks, logging, and version control.

ALCO Reporting, Attribution & Model Documentation

- Prepare analytical summaries for senior stakeholders – including clients' Heads of Risk and investment committees – covering interest rate exposure, scenario impacts, attribution of risk-measurement changes, and balance sheet sensitivities consistent with ALCO reporting standards.
- Maintain documentation of risk-measurement methodology, model assumptions, and procedures within a formal model governance framework; escalate outputs lacking mathematical or economic defensibility.

Client Service Specialist | Toronto, May 2022 – May 2023

- Led onboarding and implementation for U.S. and Canadian pension funds, asset managers, and consulting firms migrating to the PFaroe analytics platform – advised on asset, liability, and ALM configurations and validated model outputs post-deployment.

- Scoped client investment-team requirements into structured Product Owner requests; contributed to successful migration of all assigned client accounts from legacy Calypso to PFaroe PM.

Ernst & Young (EY)

Senior Consultant – IFRS & Financial Risk Transformation | Toronto, Sep 2021 – Apr 2022

- Delivered IFRS 17 and IFRS 9 technology-transformation projects for Canadian and international insurance clients – aligned regulatory requirements with system implementation and financial-reporting frameworks.
- Advised actuarial, finance, IT, and PM functions on standard adoption; contributed to governance documentation and regulatory-readiness processes.

Ortec Finance Canada

Consultant – Asset-Liability Management & Risk | Toronto, Feb 2019 – Sep 2021

- Delivered ALM studies for Canadian and international pension funds – analyzed funding ratios, duration mismatch, and long-term balance sheet risk under base-case and stressed environments.
- Built and interpreted stochastic economic scenario generators measuring interest rate risk and funding volatility; performed cash flow, liquidity, and hedging analysis across rates, inflation, and currency.
- Conducted liability-driven investment (LDI) analysis on duration alignment and liquidity trade-offs; presented findings to investment committees on-site.
- Modelled pension actuarial liabilities alongside major investment products and economic variables; performed VaR/CVaR portfolio optimization and risk decomposition on Ortec's GLASS platform.

EDUCATION & CREDENTIALS

- Chartered Financial Analyst (CFA) – CFA Institute, 2024
- MSc, Financial Modelling – Western University, 2018
- MSc, Chemical Engineering (Full Scholarship) – Western University, 2016
