Re: Associate Director, ALM (18 Month Contract) – Scotiabank

Dear Hiring Team,

I currently hold delegated sign-off authority on valuation, sensitivity, and ALM outputs for multi-asset institutional portfolios at Moody's Analytics – the same SIRR / IRRBB measurement discipline that sits at the heart of Scotiabank's Group Treasury ALM mandate. I would like to be considered for the Associate Director, ALM (18 Month Contract) role.

Over the past four years at Moody's I have overseen interest-rate risk and duration analysis under parallel and non-parallel rate shocks – producing EVE, NII, and key-rate duration outputs aligned with IRRBB standards analogous to OSFI B-12 and Basel Committee frameworks. I led the design of an enterprise multi-asset cash-flow projection engine supporting base, stress, and reverse-stress scenarios, and architected time-bucketed liquidity gap analytics from T+1 through multi-year horizons. The day-to-day rhythm of reviewing balance-sheet movements, preparing executive commentary, and maintaining SQL and Python pipelines feeding ALM reporting is exactly what I do now, across portfolios of \$5-25bn per engagement. Before Moody's, I delivered stochastic ALM and LDI studies for Canadian pension funds at Ortec Finance and financial-risk transformation engagements at EY.

What draws me to this mandate specifically is the QRM transition: Group Treasury moving onto a new ALM model is the precise problem I have worked through from the vendor and analytics side – data validation, parallel testing, output reconciliation, and reporting alignment. Pairing that platform-transition experience with hands-on IRRBB measurement and executive-reporting depth is an unusual combination for an 18-month contract, and I expect it to compress the ramp-up materially.

I am Toronto-based, available for interviews immediately, and can commit to a start approximately four weeks after offer acceptance. I hold the CFA charter and dual MSc degrees from Western University. References available on request.

Sincerely,
