SUMMARY

Manager, Market Risk candidate with ~7 years across investment risk analytics, multi-asset portfolio analytics, and institutional ALM at Moody's Analytics, EY, and Ortec Finance. Hands-on with VaR/CVaR portfolio optimization, risk decomposition and attribution, stress and scenario analysis, and derivatives sensitivities across fixed income, multi-asset, and pension mandates. Strong Python and AI-enabled workflow record. CFA charterholder with dual MSc (Financial Modelling, Engineering).

CORE SKILLS

Market Risk Analysis & Oversight • VaR / CVaR / Expected Shortfall • Stress Testing & Scenario Analysis • Risk Attribution & Decomposition • Fixed Income, Multi-Asset & Derivatives Analytics • Sensitivity Analysis & Exposure Analytics • Multi-Asset Portfolio Analytics • Python & SQL Analytics Pipelines • AI-Enabled Workflows (Claude Code, Cursor)

PROFESSIONAL EXPERIENCE

Moody's Analytics

Asst. Director, Modelling Services | Toronto, May 2023 - Present

Independent Risk Oversight & Exposure Analysis

- Hold delegated sign-off authority on valuation, sensitivity analysis, and portfolio risk outputs delivered to multi-asset institutional client portfolios ranging \$5-25bn per engagement, cumulatively covering ~\$50bn of assets across fixed income, derivatives, and multi-asset mandates.
- Validate derivatives pricing outputs across rates, FX, and inflation; cross-check sensitivity and exposure consistency at the portfolio level to support independent risk assessments of investment strategies.
- Oversee interest-rate and duration analysis under parallel and non-parallel rate shocks, linking risk measures to portfolio positioning and market movements to support risk-aware investment decisions.

Stress Testing, Scenario Analysis & Risk Attribution

- Led design and implementation of a multi-asset cash flow projection engine supporting base, stress, and reverse-stress scenarios across fixed-income and multi-asset exposures.
- Architected configurable time-bucketed analytics (T+1 through multi-year) enabling sensitivity analysis, scenario, and exposure analytics used in asset-allocation and hedging decisions.
- Embedded behavioral assumptions and macro stress overlays, linking market movements to portfolio-level risk attribution outputs reviewed by Heads of Risk and investment stakeholders.

Analytics Automation & AI-Enabled Tooling

- Re-engineered manual spreadsheet workflows into scalable, auditable Python analytics pipelines with embedded logging and validation controls.
- Built agentic AI development workflows (Claude Code, Cursor IDE) automating code generation, validation scaffolding, anomaly detection, and documentation – reducing development cycle time ~30-40% on comparable modules, with human sign-off retained on governance-critical outputs.
- Prepared analytical summaries for senior stakeholders on portfolio exposures, scenario impacts, and sensitivities – translating quantitative outputs into decision-ready insights for Heads of Risk and investment teams.

Client Service Specialist | Toronto, May 2022 - May 2023

- Led onboarding and implementation for U.S. and Canadian pension funds, asset managers, and consulting firms on the PFaroe multi-asset analytics platform; advised on portfolio, risk, and ALM configurations and validated model outputs post-deployment.
- Translated investment-team requirements into structured development requests; contributed to successful migration of all assigned client accounts from a legacy Calypso environment to PFaroe.

Ernst & Young (EY)

Senior Consultant, Financial Risk Transformation | Toronto, Sep 2021 - Apr 2022

- Delivered IFRS 17 and IFRS 9 transformation projects for Canadian and international insurance clients, aligning regulatory requirements with system implementation and risk-reporting frameworks.
- Coordinated across actuarial, finance, IT, risk, and program-management teams on milestone delivery, governance documentation, and implementation materials.

Ortec Finance Canada

Consultant, Asset-Liability Management & Risk | Toronto, Feb 2019 - Sep 2021

- Performed asset-only and asset-liability portfolio optimization based on VaR and CVaR using Ortec's GLASS platform; ran risk decomposition, contribution-to-risk, and near-optimal frontier analysis to test robustness of allocation recommendations for institutional investors.
- Built and interpreted stochastic economic scenario generators assessing interest-rate, inflation, and currency risk under base-case and stressed environments for Canadian and international pension funds.
- Conducted liability-driven investment (LDI) analysis and cash flow, liquidity, and hedging analytics across multi-asset mandates; presented findings to investment committees on duration, currency, and leverage overlay strategies.
- Led onboarding and the inaugural ALM study for the University Pension Plan (UPP) merger, validating the model capturing Funding Policy dynamics across three predecessor plans.

EDUCATION & CREDENTIALS

- Chartered Financial Analyst (CFA) - CFA Institute, 2024
- MSc, Financial Modelling - Western University, 2018
- MSc, Chemical Engineering (Full Scholarship) - Western University, 2016
