Re: Manager, Market Risk – HOOPP

Dear Hiring Team,

At Moody's Analytics I hold delegated sign-off authority on valuation, sensitivity, and portfolio risk outputs delivered to multi-asset institutional portfolios ranging \$5-25bn per engagement – the same discipline of independent risk oversight, exposure monitoring, and risk-aware partnership with investment teams that HOOPP's Manager, Market Risk role is built around.

My market-risk toolkit maps directly onto what this role requires. At Ortec Finance I performed asset-only and asset-liability portfolio optimization on VaR and CVaR using the GLASS platform, ran risk decomposition and contribution-to-risk analysis, and built stochastic scenario generators covering interest-rate, inflation, and currency risk across multi-asset pension mandates – including the inaugural ALM study for the University Pension Plan merger. At Moody's I have extended that into derivatives sensitivity validation across rates, FX, and inflation, and led the design of a multi-scenario stress testing and cash flow engine that links market movements to portfolio-level attribution. I have re-engineered manual workflows into auditable Python pipelines and deployed agentic AI workflows (Claude Code, Cursor) that cut development cycle time approximately 30-40% on comparable modules – the same combination of technical execution and judgement to validate AI-generated outputs that the posting calls out explicitly.

What draws me specifically to HOOPP is the chance to partner directly with portfolio managers on independent risk assessments, limit monitoring, and scenario analysis for a Fund whose purpose is to deliver retirement security for Ontario's healthcare workers. The newly created nature of this role and its Capital Markets focus are exactly the environment where I want to apply this experience. The CFA charter and dual MSc degrees in Financial Modelling and Chemical Engineering round out the quantitative bench. I am Toronto-based, available for interviews immediately, and can start approximately four weeks after offer acceptance. References are available on request. Thank you for considering my application.

Sincerely,
