SUMMARY

IRRBB Manager candidate with ~7 years across ALM, interest rate risk, and cash flow engine delivery. Holds delegated sign-off authority on valuation, sensitivity, and ALM outputs for multi-asset institutional portfolios at Moody's Analytics (\$5-25bn per engagement). Led design of a multi-scenario cash flow projection engine with behavioral overlays, supporting scenarios analogous to NII and EVE analytics. CFA charter; dual MSc (Financial Modelling, Engineering); Python and SQL proficient.

CORE SKILLS

Asset-Liability Management (ALM) • Interest Rate Risk (IRRBB) • Cash Flow Engine Design & Implementation • Behavioral Assumptions (Prepayment, Macro Stress Overlays) • Scenario & Sensitivity Analysis • NII & EVE Analytics (analogous framework) • Model Validation & Governance • Python & SQL • ALM System Implementation & Migration

EXPERIENCE

Moody's Analytics

Asst. Director - Modelling Services | Toronto, May 2023 - Present

Cash Flow Engine & Balance Sheet Modeling

- Led design and implementation of an enterprise multi-asset cash flow projection engine supporting base, stress, and reverse-stress scenarios across ALM horizons – analogous to NII and EVE projection frameworks used in bank IRRBB programs.
- Architected configurable time-bucketed liquidity gap analytics (T+1 through multi-year) supporting balance sheet forecasting and funding optimization decisions.
- Embedded behavioral cash flow assumptions, prepayment logic, and macro stress overlays aligned with regulatory liquidity and IRRBB expectations.
- Re-engineered manual spreadsheet workflows into scalable, auditable Python analytics pipelines with embedded logging and validation controls.

Interest Rate Risk Analytics & Model Governance

- Hold delegated sign-off authority on valuation, sensitivity, and ALM outputs for multi-asset institutional portfolios sized \$5-25bn per engagement (~\$50bn+ cumulative).
- Oversee interest rate risk and duration analysis under parallel and non-parallel rate shocks, aligned with IRRBB frameworks analogous to OSFI B-12 and Basel Committee standards.
- Validate derivatives pricing outputs across rates, FX, and inflation; reconcile sensitivities at portfolio-level ALM aggregates.
- Review curve construction, spread calibration, and cross-asset interactions prior to production release; escalate outputs lacking economic defensibility.
- Operate within formal model-governance framework – review assumptions, assess economic defensibility, and maintain documentation consistent with SR 11-7 and OSFI E-23 expectations.

Scenario Analysis, Automation & Stakeholder Reporting

- Prepare analytical summaries for senior stakeholders on interest-rate exposure, scenario impacts, and balance-sheet sensitivities; serve as primary escalation point for Heads of Risk on client-critical analytical issues.
- Built agentic AI development workflows (Claude Code, Cursor IDE) for code generation, validation scaffolding, and anomaly detection – reducing development cycle time ~30-40% on comparable modules.

Client Service Specialist | Toronto, May 2022 - May 2023

- Led onboarding and implementation of the PFaroe ALM system for U.S. and Canadian pension funds, asset managers, and consulting firms; advised clients on asset, liability, and ALM configurations.
- Served as technical liaison between client investment teams and product owners; scoped requirements into development requests and validated model outputs post-deployment.

- Contributed to the successful migration of all assigned client accounts from the legacy Calypso platform to the PFaroe PM environment.

Ernst & Young (EY)

Senior Consultant - IFRS & Financial Risk Transformation | *Toronto, Sep 2021 - Apr 2022*

- Delivered IFRS 17 and IFRS 9 transformation projects for Canadian and international insurance clients; aligned regulatory requirements with system implementation and financial-reporting frameworks.
- Contributed to governance documentation and regulatory-readiness processes; coordinated across actuarial, finance, IT, and risk functions on milestone delivery.

Ortec Finance Canada

Consultant - Asset-Liability Management & Risk | *Toronto, Feb 2019 - Sep 2021*

- Delivered ALM studies for Canadian and international pension funds; analyzed funding ratios, duration mismatch, and long-term balance-sheet risk exposures.
- Built and interpreted stochastic economic scenario generators assessing interest rate risk and funding volatility under base and stressed environments.
- Performed cash flow, liquidity, and hedging analysis across interest rate, inflation, and currency risk; modelled actuarial liabilities alongside major investment products.
- Conducted liability-driven investment (LDI) analysis covering return objectives, duration alignment, and liquidity trade-offs; presented findings to investment committees at pension-fund clients.

EDUCATION & CREDENTIALS

- Chartered Financial Analyst (CFA) - CFA Institute, 2024
- MSc, Financial Modelling - Western University, 2018
- MSc, Chemical Engineering (Full Scholarship) - Western University, 2016
