SUMMARY

AVP, Asset Liability Management candidate with ~7 years across institutional ALM, interest rate risk analytics, investment-portfolio oversight, and IFRS-aligned financial reporting for insurance clients. Holds delegated sign-off on valuation, sensitivity, and ALM outputs for multi-asset portfolios at Moody's Analytics (\$5-25bn per engagement). Delivered IFRS 17 and IFRS 9 transformation at EY for Canadian insurers and stochastic ALM and hedging studies at Ortec Finance for pension and institutional clients. CFA charterholder; dual MSc, Western University.

CORE SKILLS

Asset Liability Management (ALM) • Interest rate risk & duration analytics • Equity hedging analytics (rates, FX, inflation derivatives) • Investment mandate monitoring & portfolio-level risk oversight • IFRS 17 & IFRS 9 (delivered transformation for Canadian insurers) • OSFI guideline alignment (applied knowledge) • Stochastic scenario generation & stress testing • Actuarial liability modelling • Python, SQL, advanced Excel

PROFESSIONAL EXPERIENCE

Moody's Analytics

Asst. Director, Modelling Services | Toronto, May 2023 – Present

ALM Reporting, Strategy Assessment & Risk-Return Analysis

- Hold delegated sign-off authority on valuation, sensitivity, and ALM outputs delivered to institutional client portfolios ranging \$5-25bn per engagement, independently reviewing curve construction, spread calibration, and cross-asset interactions prior to production release.
- Prepare analytical summaries for senior stakeholders covering interest-rate exposure, scenario impacts, and balance-sheet sensitivities – translating quantitative outputs into investment-committee-ready narratives.
- Review and assess ALM configurations and analytical outputs to identify inconsistencies and opportunities to improve risk-return characterisation; escalate outputs lacking mathematical or economic defensibility, interfacing with Heads of Risk and investment stakeholders.

Interest Rate Risk, Derivatives Validation & Investment Mandate Oversight

- Oversee interest-rate risk and duration analysis under parallel and non-parallel rate shocks for multi-asset institutional portfolios, aligned with OSFI-style supervisory expectations.
- Validate derivatives pricing outputs across rates, FX, and inflation; cross-check sensitivity consistency at portfolio-level ALM aggregates supporting hedge-positioning and rebalancing reviews.
- Review aggregation logic converting security-level exposures into portfolio-level risk metrics that feed downstream ALM, capital, and investment-mandate monitoring processes.

Cash Flow Projection, Stress Testing & Liquidity Analytics

- Led design and implementation of an enterprise multi-asset cash-flow projection engine supporting base, stress, and reverse-stress scenarios, delivering forward-looking liquidity and asset-allocation visibility across ALM horizons.
- Architected configurable time-bucketed liquidity gap analytics (T+1 through multi-year) enabling funding optimisation, refinancing risk assessment, and asset-allocation decisions.
- Embedded behavioural cash-flow assumptions, prepayment logic, and macro stress overlays aligned with regulatory liquidity expectations.

Client Service Specialist | Toronto, May 2022 – May 2023

- Led onboarding and implementation for U.S. and Canadian pension funds, asset managers, and consulting firms migrating to the PFaroe analytics platform, advising on asset, liability, and ALM configurations.
- Served as technical liaison between client investment teams and product owners; scoped requirements, validated post-deployment model outputs, and migrated all assigned accounts from legacy Calypso to PFaroe.

Ernst & Young (EY)

Senior Consultant, IFRS & Financial Risk Transformation | Toronto, Sep 2021 – Apr 2022

- Delivered IFRS 17 and IFRS 9 transformation projects for Canadian and international insurers, aligning regulatory requirements with system implementation and financial-reporting frameworks.
- Advised actuarial, finance, risk, and IT functions on IFRS 17 and IFRS 9 adoption; contributed to governance documentation and OSFI regulatory-readiness processes.
- Coordinated cross-functional delivery across actuarial, finance, IT, risk, and programme management on implementation milestones.

Ortec Finance Canada

Consultant, Asset-Liability Management & Risk | Toronto, Feb 2019 – Sep 2021

- Delivered ALM studies for Canadian and international pension funds and institutional investors; analysed funding ratios, duration mismatch, and long-term balance-sheet risk exposures.
- Built and interpreted stochastic economic scenario generators assessing interest-rate risk and funding volatility under base and stressed environments.
- Conducted liability-driven investment (LDI) analysis and interest-rate, inflation, and currency hedging studies; advised clients on Strategic and Tactical Asset Allocation trade-offs via stress and sensitivity testing.
- Performed asset-only and asset-liability (surplus) portfolio optimisation on VaR and CVaR using Ortec's GLASS platform, with risk decomposition and near-optimal frontier analysis.
- Modelled pension-fund actuarial liabilities alongside all major investment-product types; presented findings to investment committees, including the University Pension Plan merger study covering duration, currency, inflation, and leverage overlay strategies.

EDUCATION & CREDENTIALS

- Chartered Financial Analyst (CFA) – CFA Institute, 2024
- MSc, Financial Modelling – Western University, 2018
- MSc, Chemical Engineering (Full Scholarship) – Western University, 2016
