SUMMARY

Candidate for the Principal, Total Portfolio Management Trading Desk role with ~7 years across fixed-income and FX analytics, derivatives valuation and sensitivity validation, liability-driven portfolio construction, and macro-rates scenario analysis for Canadian and global institutional plans. Holds delegated sign-off on multi-asset institutional portfolios; designed a multi-scenario cash-flow projection engine; conducted VaR/CVaR optimization, risk management, and cross-asset risk decomposition at Ortec Finance. Python and SQL in daily production use; VBA in professional context (reading, maintaining, refactoring). CFA charterholder; dual MSc in Financial Modelling and Chemical Engineering.

CORE SKILLS

Fixed Income & FX Analytics • Derivatives Valuation & Sensitivity (Rates, FX, Inflation) • Liability Hedging & LDI • Macro-Rates Scenario & Stress Analysis • Portfolio Construction & Risk Decomposition • VaR / CVaR Optimization • Stochastic Scenario Generation • Python (Advanced), SQL (Intermediate), VBA (Working) • AI-Enabled Analytics Workflows (Claude Code, Cursor IDE)

EXPERIENCE

Moody's Analytics

Asst. Director - Modelling Services (Investment & ALM Risk Lead) | Toronto, May 2023 - Present

Derivatives, Fixed Income & FX Analytics

- Validates derivatives pricing outputs across rates, FX, and inflation – reviews sensitivity consistency at portfolio-level aggregates for multi-asset institutional mandates prior to production release.
- Reviews yield-curve construction, spread calibration, and cross-asset interactions; escalates outputs lacking economic defensibility to Heads of Risk and investment stakeholders.
- Analyzes interest-rate and duration exposure under parallel and non-parallel shocks, supporting liability-sensitive positioning across ALM horizons.

Portfolio Analytics, Liability Hedging & Stakeholder Reporting

- Holds delegated sign-off authority on valuation, sensitivity, and ALM outputs for institutional client portfolios ranging \$5-25bn per engagement (~\$50bn+ cumulative book).
- Led design and implementation of an enterprise multi-asset cash-flow projection engine supporting base, stress, and reverse-stress scenarios – provides forward-looking liquidity visibility to support liability-hedge sizing and funding decisions.
- Architected configurable time-bucketed liquidity-gap analytics (T+1 through multi-year), enabling funding optimization and asset-allocation decisions across public-markets exposures.
- Prepared analytical summaries for senior stakeholders on rate exposure, scenario impacts, and balance-sheet sensitivities, translating quantitative outputs into investment-committee-ready narratives.

Python, SQL & AI-Enabled Tooling

- Re-engineered manual spreadsheet workflows into scalable Python analytics pipelines with embedded logging, validation, and auditability controls.
- Built agentic AI development workflows (Claude Code, Cursor IDE) automating code generation, validation scaffolding, and anomaly detection – reduced development cycle time an estimated 30-40% on comparable pricing, validation, and reporting modules.

Client Service Specialist - Buy-Side Solutions | Toronto, May 2022 - May 2023

- Led onboarding of U.S. and Canadian pension funds, asset managers, and consultants migrating to the PFaroe multi-asset platform – translated investment-desk requirements into development requests and validated post-deployment model outputs.
- Migrated all assigned client accounts from legacy Calypso to PFaroe PM, advising on asset, liability, and ALM configurations.

Ernst & Young (EY)**Senior Consultant - IFRS & Financial Risk Transformation** | Toronto, Sep 2021 - Apr 2022

- Delivered IFRS 17 and IFRS 9 transformation projects for Canadian and international insurance clients, aligning regulatory requirements with system implementation and financial-reporting frameworks.
- Coordinated across actuarial, finance, IT, risk, and program-management functions on milestone delivery, governance documentation, and regulatory-readiness materials.

Ortec Finance Canada**Consultant - Asset-Liability Management & Risk** | Toronto, Feb 2019 - Sep 2021

- Performed asset-only and asset-liability (surplus) portfolio optimization on VaR and CVaR using Ortec's GLASS platform – with risk decomposition, contribution-to-risk analysis, and near-optimal frontier robustness testing to support allocation recommendations.
- Built and interpreted stochastic economic scenario generators to assess interest-rate, inflation, and currency risk under base and stressed macro regimes for Canadian and international pension funds.
- Conducted liability-driven investment (LDI) analysis for pension-fund clients – quantified trade-offs between return targets, duration alignment, and liquidity; delivered SAA and TAA recommendations to investment committees.
- Performed cash-flow, liquidity, and hedging analysis across rates, inflation, and currency risk for international institutional clients; presented findings to investment committees on-site.
- Led onboarding and the ALM study for the University Pension Plan (UPP) three-plan merger – on a team of three, modelled Funding Policy dynamics, duration, currency, inflation, and leverage-overlay strategies.

EDUCATION & CREDENTIALS

- Chartered Financial Analyst (CFA) – CFA Institute, 2024
- MSc, Financial Modelling – Western University, 2018
- MSc, Chemical Engineering (Full Scholarship) – Western University, 2016
