SUMMARY

Associate Director, Senior Business Analyst (Capital Markets) with ~7 years translating complex institutional-investor requirements into data specifications, validated analytics, and enterprise platform delivery across ALM, portfolio risk, and multi-asset client books. Currently at Moody's Analytics with delegated sign-off on valuation and analytical outputs for portfolios of \$5-25bn per engagement; earlier roles at EY (financial-reporting transformation) and Ortec Finance (pension ALM advisory). Advanced SQL, Python, and Excel; Agile/Scrum delivery; CFA charterholder with dual MSc.

CORE SKILLS

Business Analysis & Requirements Definition • Data Modeling & SQL Analytics • Python & Excel Analytics • Reference Data & Data Quality • Agile / Scrum Delivery • Client Stakeholder Engagement • Risk & Regulatory Domain Knowledge • Enterprise Analytics Platform Delivery • Senior Stakeholder Presentation

PROFESSIONAL EXPERIENCE

Moody's Analytics

Asst. Director, Modelling Services (Investment & ALM Risk Lead)

Toronto, May 2023 - Present

Requirements Definition & Client Analytics Delivery

- Translate complex institutional-investor requirements into functional data specifications and analytical solutions for multi-asset client portfolios ranging \$5-25bn per engagement (~\$50bn cumulative book); hold delegated sign-off on valuation, sensitivity, and ALM outputs prior to production release.
- Review curve construction, spread calibration, cross-asset interactions, and reference-data inputs – escalating outputs that lack mathematical or economic defensibility before client delivery.
- Prepare analytical summaries and presentations for senior client stakeholders (Heads of Risk, investment committees) covering exposures, scenario impacts, and balance-sheet sensitivities.

Data Modeling, SQL & Enterprise Platform Delivery

- Led design and implementation of an enterprise multi-asset cash-flow projection engine (base, stress, reverse-stress) – defined aggregation logic converting security-level exposures into portfolio-level metrics, with embedded data-quality controls and validation protocols.
- Architected configurable time-bucketed analytics (T+1 to multi-year) on PFaroe DB and PFaroe PM; re-engineered manual Excel workflows into auditable Python and SQL pipelines with logging and data-quality checks.
- Built agentic AI development workflows (Claude Code, Cursor) automating code generation, validation scaffolding, and documentation – reducing delivery cycle time an estimated 30-40% on comparable modules.

Governance, Agile Delivery & Cross-Functional Collaboration

- Member of the Modelling Services governance forum – contribute to methodology review, documentation standards, and model-performance assessment feeding downstream risk and capital processes.
- Collaborate with Product Owners and engineering in Agile/Scrum ceremonies (sprint planning, backlog grooming, acceptance criteria) to drive end-to-end delivery of analytical platform features against business requirements.

Client Service Specialist

Toronto, May 2022 - May 2023

- Led onboarding and implementation for U.S. and Canadian pension funds, asset managers, and consulting firms migrating to the PFaroe analytics platform – scoped client investment-team requirements into structured Product Owner tickets and validated outputs post-deployment.
- Migrated all assigned client accounts from legacy Calypso to PFaroe PM, translating business requirements into technical deliverables across product and development teams.

Ernst & Young (EY)**Senior Consultant, IFRS & Financial Risk Transformation**

Toronto, Sep 2021 - Apr 2022

- Delivered IFRS 17 and IFRS 9 data and reporting transformation for Canadian and international insurance clients – developed requirements documentation reconciling actuarial, finance, IT, and program-management stakeholders.
- Coordinated across cross-functional teams on milestone delivery, governance documentation, and regulatory-readiness collateral; contributed to go-to-market materials for IFRS 17 advisory offerings.

Ortec Finance**Consultant, ALM & Risk**

Toronto, Feb 2019 - Sep 2021

- Delivered ALM and investment-risk studies for Canadian and international pension funds – analyzed duration, currency, inflation, and leverage strategies against funding-ratio and return objectives.
- Built and validated stochastic economic scenario generators; performed portfolio optimization (VaR / CVaR, asset-only and asset-liability) on the GLASS platform, with risk decomposition and attribution supporting investment-committee recommendations.
- Presented findings to client investment committees; led onboarding and ALM study for a three-plan university pension merger on a team of three.

EDUCATION & CREDENTIALS

- Chartered Financial Analyst (CFA) - CFA Institute, 2024
- MSc, Financial Modelling - Western University, 2018
- MSc, Chemical Engineering (Full Scholarship) - Western University, 2016
