Re: Investment Director – Confidential

Dear Hiring Team,

I currently lead investment research and portfolio-risk analysis on multi-asset institutional portfolios at Moody's Analytics, holding delegated sign-off authority on valuation, sensitivity, and portfolio-risk outputs for books of \$5-25bn per engagement. That combination of research depth and operational rigor is exactly what your Investment Director role calls for, and I would like to be considered.

My work maps directly onto the three pillars of this mandate. On due diligence and analysis, I independently review curve construction, spread calibration, and cross-asset interactions, and synthesize outputs into investment-committee-ready memoranda for senior stakeholders. On coordinating the process, I have run full implementation and study lifecycles across investment teams, product owners, and actuaries – including a three-plan pension merger and the migration of an entire client book. On macro research and market analysis, I built and interpreted stochastic economic scenario generators at Ortec Finance to assess interest-rate, inflation, and funding-volatility exposures under base and stressed regimes, then distilled the results into allocation recommendations that investment committees adopted. I complement this with hands-on VaR/CVaR portfolio optimization, risk decomposition, and Python and SQL analytics pipelines.

What draws me to your firm is its research-driven, high-autonomy process across alternative strategies and direct investments – the kind of environment where independent judgment and analytical defensibility matter more than headcount. My advisory roots at Ortec and EY, combined with four years as a practitioner at Moody's, mean I can source and screen opportunities, pressure-test a manager's process and performance attribution, and own the memo that goes to leadership. I hold the CFA charter and dual MSc degrees in Financial Modelling and Chemical Engineering.

I am available for interviews immediately and can start approximately four weeks after offer acceptance. My resume is attached and references are available on request. Thank you for your consideration.

Sincerely,
