SUMMARY

Senior Manager, Capital & Liquidity Management candidate with ~7 years across institutional balance-sheet risk, ALM, and liquidity analytics. Holds delegated sign-off authority on ALM, valuation, and sensitivity outputs for multi-asset portfolios (\$5-25bn per engagement) at Moody's Analytics, where a multi-scenario cash-flow projection and liquidity-gap engine was designed end-to-end. Deep in stress testing, funding analysis, and AI-accelerated modelling. CFA charterholder; dual MSc in Financial Modelling and Chemical Engineering.

CORE SKILLS

Capital & Liquidity Management • Asset Liability Management (ALM) • Balance Sheet & Funding Strategy • Stress Testing & Scenario Design • Liquidity Gap & Cash-Flow Forecasting • Asset Risk Assessment • Risk Appetite & Limits Frameworks • Python Analytics & AI-Assisted Workflows • Executive & Board-Level Reporting

EXPERIENCE

Moody's Analytics

Asst. Director - Modelling Services

Toronto, May 2023 - Present

Capital, Liquidity & Balance-Sheet Analytics

- Led design and implementation of an enterprise multi-asset cash-flow projection engine supporting base, stress, and reverse-stress scenarios, delivering forward-looking liquidity visibility across ALM horizons.
- Architected configurable time-bucketed liquidity gap analytics (T+1 through multi-year) enabling funding optimization, refinancing risk assessment, and asset-allocation decisions.
- Embedded behavioral cash-flow assumptions, prepayment logic, and macro stress overlays into forecasting to support liquidity planning and contingency analysis.
- Oversaw interest-rate and duration analysis under parallel and non-parallel rate shocks, assessing asset risk and balance-sheet sensitivity across multi-asset positions.

Governance, Oversight & Reporting

- Holds delegated sign-off authority on valuation, sensitivity, and ALM outputs for multi-asset institutional portfolios (\$5-25bn per engagement; ~\$50bn+ cumulative), independently reviewing calibration and cross-asset interactions before release.
- Serves on the model governance committee, contributing to methodology review, documentation and benchmarking standards, and model-performance assessment.
- Prepared analytical summaries for senior stakeholders on rate exposure, scenario impacts, and balance-sheet sensitivities, translating quantitative outputs into decision-ready narratives for non-technical audiences.
- Serves as escalation point for client-critical analytical issues, interfacing directly with Heads of Risk and investment stakeholders.

Technology & AI Enablement

- Re-engineered manual spreadsheet workflows into scalable, auditable Python analytics pipelines with embedded logging and validation controls.
- Deployed agentic AI development workflows (Claude Code, Cursor IDE) automating code generation, validation scaffolding, and anomaly detection, reducing development cycle time an estimated 30-40% on comparable modules.

Client Service Specialist

Toronto, May 2022 - May 2023

- Led onboarding and implementation for U.S. and Canadian pension funds, asset managers, and consulting firms migrating to the PFaroe analytics platform, translating investment-team requirements into development requests and validating model outputs post-deployment.
- Advised clients on asset, liability, and ALM configurations across a multi-account migration from the legacy Calypso platform.

Ernst & Young (EY)**Senior Consultant - Financial Risk Transformation**

Toronto, Sep 2021 - Apr 2022

- Delivered IFRS 17 and IFRS 9 transformation projects for Canadian and international insurance clients, aligning regulatory requirements with system implementation and financial-reporting frameworks.
- Advised actuarial, IT, finance, and program teams on governance documentation and regulatory-readiness processes for financial institutions.

Ortec Finance Canada**Consultant - Asset-Liability Management & Risk**

Toronto, Feb 2019 - Sep 2021

- Delivered ALM studies for Canadian and international pension funds and institutional investors, analyzing funding ratios, duration mismatch, and long-term balance-sheet risk exposures.
- Built and interpreted stochastic economic scenario generators assessing interest-rate risk and funding volatility under base-case and stressed environments.
- Performed cash-flow, liquidity, and hedging analysis across interest-rate, inflation, and currency risk for institutional clients, and presented findings to investment committees.
- Performed asset-only and asset-liability (surplus) portfolio optimization on VaR and CVaR using Ortec's GLASS platform, with risk decomposition and near-optimal frontier robustness testing.

EDUCATION & CREDENTIALS

- Chartered Financial Analyst (CFA) - CFA Institute, 2024
- MSc, Financial Modelling - Western University, 2018
- MSc, Chemical Engineering (Full Scholarship) - Western University, 2016
