SUMMARY

Investment analytics and reporting specialist with ~7 years of experience aligned to the Vice President, Performance Reporting & Analytics mandate: multi-asset portfolio analytics, exposure monitoring, and liquidity forecasting for institutional investors. Holds delegated sign-off authority at Moody's Analytics on valuation and sensitivity outputs for client portfolios of \$5-25bn per engagement. Performed VaR/CVaR portfolio optimization, risk attribution, and stochastic stress-testing analytics at Ortec Finance, presenting results to pension investment committees. CFA charterholder; dual MSc.

CORE SKILLS

Multi-Asset Portfolio Analytics & Exposure Reporting • Value-at-Risk (VaR) & Conditional VaR (CVaR) • Risk Attribution & Decomposition (Contribution-to-Risk) • Scenario Analysis & Stress Testing • Liquidity Forecasting & Cash Flow Projection Modelling • Portfolio Optimization (Asset-Only & Asset-Liability) • Data Governance, Validation & Model Reconciliation Controls • Institutional Client Onboarding & Platform Implementation • Investment Committee & Executive Reporting • Stochastic Modelling & Monte Carlo Simulation • Python, SQL & Advanced Excel • Cross-Functional Delivery with Product & Technology Teams

EXPERIENCE

Moody's Analytics

Asst. Director - Modelling Services

Toronto, May 2023 - Present

Portfolio Analytics, Valuation & Exposure Reporting

- Holds delegated sign-off authority on valuation, sensitivity, and exposure analytics delivered to multi-asset institutional client portfolios of \$5-25bn per engagement (~\$50bn+ cumulative), independently reviewing curve construction, spread calibration, and cross-asset interactions before production release.
- Reviewed aggregation logic converting security-level exposures into portfolio-level analytics feeding downstream client reporting processes.
- Validated derivatives valuation outputs across rates, FX, and inflation, cross-checking sensitivity consistency at portfolio-level aggregates.
- Prepared analytical summaries for senior stakeholders on scenario impacts, exposure, and portfolio sensitivities, translating quantitative output into investment-committee-ready narratives.

Liquidity Forecasting & Cash Flow Modelling

- Led design and implementation of an enterprise multi-asset cash flow projection engine supporting base, stress, and reverse-stress scenarios, delivering forward-looking liquidity visibility across multi-year horizons.
- Architected configurable time-bucketed liquidity gap analytics (T+1 through multi-year) enabling liquidity profiling, funding optimization, and asset-allocation decisions.
- Embedded behavioral cash flow assumptions, prepayment logic, and macro stress overlays into projection scenarios.

Data Pipeline, Validation & Governance

- Serves on the model governance committee, contributing to methodology review, documentation standards, and model-performance assessment for client-delivered analytics.
- Re-engineered manual spreadsheet workflows into scalable Python analytics pipelines with embedded logging, validation, and audit trails, supporting data governance over client-delivered reporting.
- Escalated outputs lacking mathematical or economic defensibility and served as escalation point for client-critical analytical issues, interfacing directly with clients' Heads of Risk and investment stakeholders.

Client Service Specialist

Toronto, May 2022 - May 2023

- Led onboarding and implementation for U.S. and Canadian pension funds, asset managers, and consulting firms migrating to PFaroe DB (risk & ALM analytics) and PFaroe PM (portfolio management).

- Acted as technical liaison between client investment teams and product owners, scoping requirements into development requests and validating model outputs post-deployment.
- Completed migration of all assigned client accounts from the legacy Calypso platform to PFaroe PM, advising clients on asset, liability, and reporting configurations.

Ernst & Young (EY)

Senior Consultant - IFRS & Financial Risk Transformation

Toronto, Sep 2021 - Apr 2022

- Delivered IFRS 17 and IFRS 9 transformation projects for Canadian and international insurance clients, aligning reporting requirements with system implementation and governance documentation.
- Developed IFRS 17 advisory product offerings and go-to-market collateral, coordinating actuarial, finance, IT, risk, and program-management teams on milestone delivery.

Ortec Finance Canada

Consultant - Asset-Liability Management & Risk

Toronto, Feb 2019 - Sep 2021

- Performed asset-only and asset-liability (surplus) portfolio optimization on VaR and CVaR using Ortec's GLASS platform, with risk decomposition, contribution-to-risk attribution, and near-optimal frontier analysis to test allocation robustness.
- Delivered ALM and portfolio studies for Canadian and international pension funds and institutional investors, analyzing funding ratios, duration mismatch, and long-horizon balance-sheet exposures.
- Built and interpreted stochastic economic scenario generators supporting scenario analysis and stress testing of funding volatility and interest-rate exposure.
- Presented study findings and strategic asset allocation recommendations to investment committees at Canadian pension-fund clients on-site.
- Led onboarding and the ALM study for a three-plan university pension merger, on a team of three developing and validating the model capturing all funding-policy dynamics across duration, currency, inflation, and leverage overlays.

EDUCATION & CREDENTIALS

- Chartered Financial Analyst (CFA) - CFA Institute, 2024
- MSc, Financial Modelling - Western University, 2018
- MSc, Chemical Engineering (Full Scholarship) - Western University, 2016
