

Saber Ayatollahi, CFA, MSc

Asset–Liability Management & Interest Rate Risk | Director / VP Level

Toronto, Canada | +1 (416) 856-1276 | saber.ayatollahi@gmail.com | [linkedin.com/in/sayatollahi](https://www.linkedin.com/in/sayatollahi)

PROFESSIONAL SUMMARY

Asset–Liability Management and Interest Rate Risk professional with 8+ years across Moody's Analytics, EY, and Ortec Finance. Formal model sign-off authority over multi-asset institutional portfolios of \$10–25bn. Deep expertise in EVE/NII sensitivity analysis, IRRBB frameworks, duration and repricing gap analytics, stochastic scenario modelling, and liquidity cash flow projection. Delivered ALM, risk, and IFRS 17/9 advisory across Canadian pension funds, insurance companies, and banking clients. CFA charterholder with dual MSc in Financial Modelling and Chemical Engineering.

CORE COMPETENCIES

ALM & Balance Sheet Risk	EVE/NII Sensitivity · IRRBB · Duration Gap · Repricing Analysis
Liquidity & Cash Flow	Multi-horizon Cash Flow Projection · Liquidity Gap · Stress Scenarios
Derivatives & Fixed Income	Rates · FX · Inflation Derivatives · Spread Calibration · Pricing
Institutional Asset Classes	Pension (Defined Benefit/LDI) · Insurance (IFRS 17/CSM/BEL) · Banking
Model Governance	Sign-off Authority · Model Risk · Internal Review · Audit Readiness
Tools & Quantitative	Python · SQL · Monte Carlo · Stochastic ESG · PFaroe PM · Calypso

PROFESSIONAL EXPERIENCE

Assistant Director – Modelling Services

Moody's Analytics – Asset Management & Buy-Side Solutions

May 2023 – Present · Toronto, Canada

- Held formal sign-off authority for ALM, valuation, and sensitivity results across multi-asset institutional portfolios of \$10–25bn — serving pension funds, asset managers, and banking clients across North America.
- Independently reviewed and approved EVE and NII sensitivities under stress and base-case scenarios consistent with IRRBB risk management frameworks; validated duration, convexity, and parallel/non-parallel shock impacts.
- Led design and implementation of an enterprise-grade, multi-asset cash flow projection engine supporting base, stress, and reverse-stress scenarios — enabling forward-looking visibility into portfolio liquidity dynamics across ALM horizons.
- Architected configurable liquidity gap analytics (T+1 through multi-year) for proactive funding optimization and refinancing risk assessment; embedded behavioral cash flow assumptions and macro stress overlays.
- Operated as final model owner and escalation point for client-critical analytical issues; challenged yield curve construction, spread calibration, and cross-asset stress behaviors through the internal model risk committee.
- Leveraged agentic AI workflows to accelerate model architecture design, automate code generation and validation, and implement anomaly detection — significantly reducing development cycle time.

Client Service Specialist – ALM & Risk Analytics

Moody's Analytics

May 2022 – May 2023 · Toronto, Canada

- Co-led end-to-end migration of 10 institutional clients (pension funds, asset managers, consulting firms) from the legacy Calypso security-level pricing platform to Moody's PFaroe PM — validating all sensitivity aggregation frameworks, valuation outputs, and ALM results before and after cutover.
- Led onboarding and implementation for U.S. and Canadian clients; configured platform environments, translated business requirements into development requests, and ensured production readiness across ALM and risk analytics modules.

- Advised clients on asset, liability, and ALM model configurations; validated model outputs post-deployment across fixed income, derivatives, and multi-asset portfolios.

Senior Consultant – IFRS & Financial Risk Transformation

[Ernst & Young \(EY\)](#)

Sep 2021 – Apr 2022 · Toronto, Canada

- Delivered IFRS 17 and IFRS 9 transformation projects for Canadian and international insurance clients — including CSM/BEL modelling, discount rate frameworks, and transition impact analysis.
- Collaborated with actuarial, finance, and risk teams to align regulatory requirements with system implementation; contributed to OSFI-readiness documentation and governance frameworks.

Senior Consultant – Asset-Liability Management & Risk

[Ortec Finance Canada](#)

Feb 2019 – Sep 2021 · Toronto, Canada

- Delivered ALM studies for Canadian and international defined benefit pension funds — analysing funding ratios, duration mismatch, solvency risk, and long-term liability exposure across multi-asset portfolios.
- Built and interpreted stochastic economic scenario generators to assess interest rate risk and funding volatility; conducted LDI analysis evaluating duration alignment, return objectives, and liquidity trade-offs.
- Presented findings to investment committees and senior stakeholders to support strategic asset allocation decisions.

EDUCATION & CREDENTIALS

Chartered Financial Analyst (CFA) – CFA Institute, 2024

MSc, Financial Modelling & Financial Mathematics – Western University, 2018 (GPA: 91/100)

MSc, Chemical Engineering (Full Scholarship) – Western University, 2016 (GPA: 95/100)
