Re: VP, Portfolio Management, Investing & Oversight – Richardson Wealth

Dear Hiring Team,

For four years at Moody's Analytics I have held delegated sign-off authority on the valuation, sensitivity, and portfolio-level risk outputs institutional clients act on, and I led client onboarding onto Moody's PFaroe platform, supporting migration of assigned accounts off a legacy system. That combination of platform delivery, governance discipline, and daily translation between investment teams and technology is close to the core of the VP, Portfolio Management, Investing & Oversight mandate, and it is why I am applying.

Parts of my current mandate are adjacent to this role, though my delivery has been institutional rather than advisor-channel. I sit on Moody's model governance committee, covering methodology review, documentation, benchmarking standards, and performance assessment for our quantitative and valuation models – a governance discipline transferable to model-portfolio oversight, even though the models I govern are analytical rather than advisor-facing. My mandate also includes independent review and challenge, and escalating outputs that are mathematically defensible but economically unsupported, with clients' Heads of Risk as my escalation counterpart – the same auditability instinct this role needs to embed into advisor workflows. I have also re-engineered spreadsheet workflows into Python pipelines with embedded logging and validation controls, and scoped client requirements into structured Product Owner requests. Earlier, at Ortec Finance, I advised pension and institutional clients on strategic and tactical asset allocation, ran VaR/CVaR portfolio optimization with risk decomposition and attribution, and presented recommendations to investment committees.

What makes Richardson Wealth compelling is the scope of the mandate: one portfolio-management experience built to scale across both Richardson Wealth and IA Private Wealth, with compliance designed in rather than bolted on. I have not worked inside the advisor channel directly, but the underlying discipline – translating how portfolios are constructed, monitored, and reviewed into workflows that survive governance scrutiny while reducing manual effort – is the craft I practice today. I hold the CFA charter and dual MSc degrees from Western University. I am Toronto-based, available for interviews immediately, and can start approximately four weeks after an offer. Thank you for your consideration.

Sincerely,
