SUMMARY

VP Data Product Owner candidate with ~7 years bridging institutional investment teams and the enterprise analytics and data products they run on. At Moody's Analytics, led client onboarding and the Calypso-to-PFaroe migration, scoped business requirements into Product Owner development requests, and serves on the model governance committee setting documentation, benchmarking, and validation standards. Re-engineered spreadsheet workflows into auditable Python and SQL pipelines with AI-assisted automation. CFA charterholder, dual MSc; asset management and insurance client depth from Ortec Finance and EY.

CORE SKILLS

Enterprise Analytics & Data Product Delivery • Business Requirements Scoping for Product Owners • Governance, Documentation & Quality Standards • Client Onboarding & Product Adoption • Cross-Functional Delivery (Business, IT, Risk, Finance) • Stakeholder Management & Executive Communication • Python, SQL & Analytics Pipeline Automation • AI-Assisted Development Workflows (Claude Code, Cursor) • Asset Management & Institutional Investment Analytics

EXPERIENCE

Moody's Analytics

Asst. Director, Modelling Services

Toronto, May 2023 - Present

Analytics & Data Product Delivery

- Led design and implementation of an enterprise multi-asset cash flow projection engine supporting base, stress, and reverse-stress scenarios, giving institutional clients forward-looking liquidity visibility they previously lacked.
- Re-engineered manual spreadsheet workflows into scalable Python pipelines (pandas, PostgreSQL/SQL) with embedded logging, validation, and auditability controls, closing an internal governance audit.
- Built agentic AI development workflows (Claude Code, Cursor IDE) automating code generation, validation scaffolding, anomaly detection, and documentation, reducing development cycle time an estimated 30-40% on comparable modules.

Governance, Quality & Standards

- Serves on the model governance committee, contributing to methodology review, documentation and benchmarking standards, and model-performance assessment for client-delivered analytics.
- Holds delegated sign-off authority on valuation, sensitivity, and ALM outputs for multi-asset institutional portfolios of \$5-25bn per engagement (~\$50bn+ cumulative), validating assumptions and economic defensibility prior to production release -- the same trust-in-the-numbers bar a data product must clear before business adoption.

Stakeholder Engagement & Escalation

- Prepared analytical summaries for senior stakeholders on interest-rate exposure, scenario impacts, and balance-sheet sensitivities, translating quantitative output into decision-ready narratives for investment committees and business stakeholders.
- Acts as escalation point for client-critical analytical issues, interfacing directly with clients' Heads of Risk and investment stakeholders.

Client Service Specialist

Toronto, May 2022 - May 2023

Client Onboarding & Requirements Translation

- Led onboarding and implementation for U.S. and Canadian pension funds, asset managers, and consulting firms adopting PFaroe DB (risk & ALM analytics) and PFaroe PM (portfolio management).
- Served as technical liaison between client investment teams and product owners, translating business requirements into scoped development requests and advising on asset, liability, and ALM configurations.

- Migrated all assigned client accounts from the legacy Calypso platform to PFaroe PM and validated model outputs post-deployment, underpinning each client's adoption of the new platform.

Ernst & Young (EY)

Senior Consultant, IFRS & Financial Risk Transformation

Toronto, Sep 2021 - Apr 2022

- Delivered IFRS 17 and IFRS 9 technology-transformation programs for Canadian and international insurance clients, aligning regulatory requirements with system implementation and financial-reporting frameworks.
- Coordinated actuarial, finance, IT, risk, and program-management teams on milestone delivery, and contributed to governance documentation and regulatory-readiness processes.
- Developed IFRS 17 advisory product offerings and go-to-market collateral for the practice.

Ortec Finance Canada

Consultant, Asset-Liability Management & Risk

Toronto, Feb 2019 - Sep 2021

- Delivered ALM and strategic asset allocation studies for Canadian and international pension funds and institutional investors, analyzing funding ratios, duration mismatch, and long-horizon balance-sheet risk.
- Performed asset-only and asset-liability (surplus) portfolio optimization on VaR and CVaR using Ortec's GLASS platform, with risk decomposition and near-optimal frontier analysis to test allocation robustness.
- Presented study findings on-site to investment committees at pension-fund clients, converting stochastic scenario output into allocation recommendations.

EDUCATION & CREDENTIALS

- Chartered Financial Analyst (CFA) - CFA Institute, 2024
- MSc, Financial Modelling - Western University, 2018
- MSc, Chemical Engineering (Full Scholarship) - Western University, 2016
