SUMMARY

Business analytics professional with ~7 years partnering with senior stakeholders at asset managers, pension funds, and consulting firms to turn complex data into decisions -- directly aligned with the Director, Business Analytics and Insights mandate. Led the design of an enterprise analytics engine, re-engineered manual spreadsheet reporting into audited Python pipelines, and built agentic AI workflows that cut development cycle time an estimated 30-40%. CFA charterholder with dual MSc degrees; track record of independently-reviewed analytical output trusted across roughly \$50bn of institutional client portfolios.

CORE SKILLS

Business Analytics & Insight Delivery • Performance & Risk Metrics Reporting (KPI-style) • Data Visualization (Python/Excel) & Executive Reporting • AI-Enabled Automation (Claude Code, Cursor) • Rapid Prototyping & Pipeline Modernization • Python (pandas, NumPy, SciPy) • SQL / PostgreSQL • Git & CI/CD Workflows • Model & Data Quality, Governance & Controls • Executive & Stakeholder Management • Asset Management & Institutional Client Domain • Cross-Functional Delivery & Mentorship

EXPERIENCE

Moody's Analytics

Asst. Director - Modelling Services

Toronto, May 2023 - Present

Business Analytics & Insight Delivery

- Led design and implementation of an enterprise multi-asset cash flow projection engine supporting base, stress, and reverse-stress scenarios, converting a manual process into a repeatable analytics capability across institutional portfolios of \$5-25bn per engagement.
- Architected configurable time-bucketed analytics (T+1 through multi-year) that gave client investment teams forward-looking funding and liquidity insight to guide allocation decisions.
- Reviewed aggregation logic converting security-level data into portfolio-level risk and performance metrics -- the analytics equivalent of KPI reporting -- delivered to client Heads of Risk and downstream reporting processes.

AI Enablement, Automation & Rapid Prototyping

- Built agentic AI development workflows (Claude Code, Cursor IDE) automating code generation, validation scaffolding, anomaly detection, and documentation - reducing development cycle time an estimated 30-40% on comparable modules.
- Re-engineered manual spreadsheet reporting workflows into scalable Python analytics pipelines with embedded logging, validation, and auditability controls, improving data quality and consistency of outputs.
- Prototyped replacement pipelines in parallel with live delivery, ran them in shadow mode for two reporting cycles, reconciled results, and cut over with a rollback plan - a pattern reused across adjacent workflows.

Stakeholder Partnership & Executive Communication

- Prepared analytical summaries for senior stakeholders on exposure, scenario impacts, and balance-sheet sensitivities, translating quantitative output into investment-committee-ready narratives.
- Served as escalation point for client-critical analytical issues, interfacing directly with clients' Heads of Risk and investment stakeholders to resolve and remediate.
- Mentored junior colleagues and acted as senior reviewer within a 12-person modelling services team, setting the review standard applied before client release.

Model & Data Governance, Controls & Quality

- Held delegated sign-off authority on valuation, sensitivity, and ALM outputs delivered to multi-asset institutional portfolios (\$5-25bn per engagement, ~\$50bn+ cumulative), independently reviewing methodology and assumptions before production release.

- Member of the model governance committee - contributed to methodology review, documentation and benchmarking standards, and performance assessment for client-delivered analytics.

Client Service Specialist

Toronto, May 2022 - May 2023

- Led onboarding and implementation for U.S. and Canadian pension funds, asset managers, and consulting firms migrating to the PFaroe DB (risk & ALM analytics) and PFaroe PM (portfolio management) platforms.
- Acted as technical liaison between client investment teams and product owners, scoping business requirements into prioritized development requests and validating outputs post-deployment.
- Contributed to the successful migration of all assigned client accounts from the legacy Calypso platform to PFaroe PM.

Ernst & Young (EY)

Senior Consultant - IFRS & Financial Risk Transformation

Toronto, Sep 2021 - Apr 2022

- Delivered IFRS 17 and IFRS 9 technology-transformation projects for Canadian and international insurance clients, aligning reporting requirements with system implementation.
- Coordinated cross-functional actuarial, finance, IT, risk, and program-management teams on milestone delivery, governance documentation, and regulatory-readiness materials.

Ortec Finance Canada

Consultant - Asset-Liability Management & Risk

Toronto, Feb 2019 - Sep 2021

- Delivered analytics studies for Canadian and international pension funds and institutional investors, quantifying funding ratio, duration, and long-horizon exposures to inform strategic allocation decisions.
- Performed asset-only and asset-liability portfolio optimization on VaR and CVaR using Ortec's GLASS platform, with risk decomposition and attribution to test the robustness of recommendations.
- Built and interpreted stochastic economic scenario generators assessing interest-rate and funding volatility under base-case and stressed environments.
- Presented findings and recommendations on-site to investment committees at pension-fund clients, including the onboarding and study for a three-plan university pension merger.

EDUCATION & CREDENTIALS

- Chartered Financial Analyst (CFA) - CFA Institute, 2024
- MSc, Financial Modelling - Western University, 2018
- MSc, Chemical Engineering (Full Scholarship) - Western University, 2016
