SUMMARY

Analytics and insights professional with ~7 years across asset management, pension, and insurance clients – directly aligned to the Director, Business Analytics & Insights mandate. Holds delegated sign-off on valuation, sensitivity, and portfolio analytics delivered to institutional portfolios of \$5-25bn per engagement at Moody's Analytics, translating those outputs into executive- and investment-committee-ready reporting. Re-engineered manual spreadsheet workflows into auditable Python pipelines, and partners with product, technology, and client stakeholders on model governance, validation, and reporting quality. CFA; dual MSc.

CORE SKILLS

Executive & Committee-Level Reporting • Scenario & Stress-Testing Analytics • Multi-Asset Investment Analytics • Python (pandas, NumPy, SciPy) • SQL / PostgreSQL • Data Visualization (Plotly, Excel) • Model Governance & Data Auditability • Cross-Functional Partnership (Technology, Product, Client Teams) • Asset Management & Pension Domain Analytics • Client Onboarding & Requirements Scoping • Risk Decomposition & Attribution • Mentoring & Senior Analytical Review

EXPERIENCE

Moody's Analytics

Asst. Director, Modelling Services

Toronto, May 2023 - Present

Analytics, Insights & Executive Reporting

- Holds delegated sign-off authority on valuation, sensitivity, and portfolio analytics delivered to institutional clients - portfolios of \$5-25bn per engagement, ~\$50bn+ cumulative - independently reviewing methodology and results before release.
- Translates complex quantitative outputs into decision-ready reporting for senior stakeholders, covering portfolio exposures, scenario impacts, and balance-sheet sensitivities for investment committees.
- Serves as escalation point for client-critical analytical issues, interfacing directly with clients' Heads of Risk and investment stakeholders.

Advanced Analytics & Solution Build

- Led design and implementation of an enterprise multi-asset cash-flow projection engine supporting base, stress, and reverse-stress scenario analysis across multi-year horizons.
- Architected configurable time-bucketed analytics (T+1 through multi-year) enabling funding, refinancing, and asset-allocation decisions for institutional clients.
- Built agentic AI development workflows (Claude Code, Cursor IDE) automating code generation, validation scaffolding, anomaly detection, and documentation - cutting development cycle time an estimated 30-40% on comparable modules.

Data Quality, Model Governance & Auditability

- Re-engineered manual spreadsheet workflows into scalable Python analytics pipelines with embedded logging, validation, and auditability controls.
- Serves on the model governance committee, contributing to methodology review, documentation and benchmarking standards, and model-performance assessment for client-delivered analytics.
- Reviews aggregation logic converting security-level exposures into portfolio-level metrics feeding downstream reporting; mentors junior colleagues within the ~12-person Modelling Services team.

Client Service Specialist

Toronto, May 2022 - May 2023

- Led onboarding and implementation for U.S. and Canadian pension funds, asset managers, and consulting firms adopting the PFaroe DB (risk & ALM) and PFaroe PM (portfolio management) analytics platforms.
- Acted as technical liaison between client investment teams and product owners - scoping business requirements into development requests and validating model outputs post-deployment.

- Contributed to the successful migration of all assigned client accounts from the legacy Calypso platform to PFaroe PM.

Ernst & Young (EY)

Senior Consultant, Financial Risk

Toronto, Sep 2021 - Apr 2022

- Delivered IFRS 17 and IFRS 9 transformation programs for Canadian and international insurers, aligning reporting requirements with system implementation.
- Coordinated actuarial, finance, IT, risk, and program-management teams on milestone delivery and implementation materials.
- Developed advisory product offerings and go-to-market collateral for IFRS 17 implementation services.

Ortec Finance Canada

Consultant, ALM & Risk

Toronto, Feb 2019 - Sep 2021

- Presented study findings and allocation recommendations directly to investment committees at Canadian pension-fund clients.
- Performed asset-only and asset-liability portfolio optimization on VaR and CVaR using Ortec's GLASS platform, with risk decomposition and near-optimal frontier analysis to test the robustness of recommendations.
- Built and interpreted stochastic economic scenario generators assessing interest-rate risk and funding volatility under base-case and stressed environments.
- Delivered ALM studies for pension funds and institutional investors - funding ratios, duration mismatch, and long-term balance-sheet exposures.
- Led onboarding and the ALM study for a three-plan university pension merger on a team of three, developing and validating the model capturing all funding-policy dynamics.

EDUCATION & CREDENTIALS

- Chartered Financial Analyst (CFA) - CFA Institute, 2024
- MSc, Financial Modelling - Western University, 2018
- MSc, Chemical Engineering (Full Scholarship) - Western University, 2016
