SUMMARY

Senior Manager, Analytics and Insights profile with ~7 years producing performance metrics, automated reporting, and decision-ready insights for risk and governance stakeholders. At Moody's Analytics, holds delegated sign-off on analytical outputs for institutional portfolios (\$5-25bn per engagement), re-engineered manual spreadsheet reporting into auditable Python analytics pipelines, and cut cycle time an estimated 30-40% via automated validation and anomaly-detection scaffolding. CFA charterholder with dual MSc degrees; regular presenter to executive and committee audiences.

CORE SKILLS

Performance Metrics & Executive Reporting • Executive Summaries & Data Storytelling • Deep-Dive Quantitative Analysis & Sensitivity Review • Python (pandas, NumPy, SciPy) • SQL (PostgreSQL) • Automated Data Pipelines & Workflow Automation • Advanced Excel & Visualization (Plotly, matplotlib) • Scenario Analysis & Stress Testing • Quality Assurance, Governance & Oversight • Issue Identification, Challenge & Escalation • Stakeholder Management & Cross-Functional Delivery • Agentic AI Workflows (Claude Code, Cursor) - automated validation scaffolding & anomaly detection in code/analytics pipelines; Git / CI-CD

EXPERIENCE

Moody's Analytics

Asst. Director - Modelling Services

Toronto, May 2023 - Present

Reporting, Portfolio Insights & Executive Communication

- Prepared analytical summaries for senior stakeholders covering exposure, scenario impacts, and balance-sheet sensitivities - translating quantitative results into committee-ready narratives for executive and business-line audiences.
- Served as escalation point for client-critical analytical issues, interfacing directly with clients' Heads of Risk and investment stakeholders on findings requiring management attention.
- Reviewed aggregation logic converting security-level detail into portfolio-level metrics, giving stakeholders both headline and more granular views of the same book.

Automated Reporting, Data Pipelines & Analytics Tooling

- Re-engineered manual spreadsheet workflows into scalable Python analytics pipelines with embedded logging, validation, and auditability controls.
- Built agentic AI development workflows (Claude Code, Cursor IDE) automating code generation, validation scaffolding, anomaly detection, and documentation - reducing development cycle time an estimated 30-40% on comparable modules.
- Led design and implementation of an enterprise multi-asset cash-flow projection engine supporting base, stress, and reverse-stress scenarios, providing forward-looking visibility used in executive contingency planning.

Quality Assurance, Governance & Oversight

- Held delegated sign-off authority on valuation, sensitivity, and ALM outputs for institutional portfolios of \$5-25bn per engagement (~\$50bn+ cumulative), independently reviewing methodology and assumptions before production release.
- Contributed as a member of the model governance committee to methodology review, documentation and benchmarking standards, and performance assessment of client-delivered analytics.
- Challenged and escalated outputs that were mathematically consistent but economically indefensible, holding release until assumptions and methodology could be independently justified.

Client Service Specialist

Toronto, May 2022 - May 2023

- Led onboarding and implementation for U.S. and Canadian pension funds, asset managers, and consulting firms adopting the PFaroe DB (risk & ALM analytics) and PFaroe PM (portfolio management) platforms.

- Acted as technical liaison between client teams and product owners - scoping business requirements into development requests and validating model outputs post-deployment.
- Contributed to migrating all assigned client accounts from the legacy Calypso environment to PFaroe PM.

Ernst & Young (EY)

Senior Consultant - IFRS & Financial Risk Transformation

Toronto, Sep 2021 - Apr 2022

- Delivered IFRS 17 and IFRS 9 technology-transformation projects for Canadian and international insurance clients.
- Contributed to governance documentation and regulatory-readiness processes while coordinating actuarial, finance, IT, risk, and program-management teams on milestone delivery and implementation materials.

Ortec Finance Canada

Consultant - Asset-Liability Management & Risk

Toronto, Feb 2019 - Sep 2021

- Delivered analytical studies for Canadian and international pension funds - quantifying funding-ratio, duration-mismatch, and long-horizon exposures under base-case and stressed conditions.
- Built and interpreted stochastic scenario generators and performed risk decomposition and attribution (contribution-to-risk, risk budgeting) to isolate the drivers behind headline results.
- Presented study findings and recommendations on-site to investment committees at pension-fund clients.

EDUCATION & CREDENTIALS

- Chartered Financial Analyst (CFA) - CFA Institute, 2024
- MSc, Financial Modelling - Western University, 2018
- MSc, Chemical Engineering (Full Scholarship) - Western University, 2016
