SUMMARY

Senior Manager, Analytics Insights candidate with ~7 years advising institutional clients on analytics-led transformation across Moody's Analytics, EY, and Ortec Finance. Holds delegated sign-off authority on analytical outputs for client portfolios of \$5-25bn per engagement and sits on a model governance committee. Builds Python and SQL analytics pipelines, stochastic simulation and optimization models, and agentic AI delivery workflows that cut development cycle time an estimated 30-40%. CFA, dual MSc.

CORE SKILLS

Analytics-Led Client Advisory • Analytical Quality Review & Sign-Off • Executive & Stakeholder Communication (Heads of Risk, Investment Committees) • Python (pandas, NumPy, SciPy) • SQL (PostgreSQL) & R (working knowledge) • Statistical, Stochastic & Monte Carlo Modelling • Optimization & Scenario Simulation (VaR/CVaR) • Agentic AI & Generative AI Delivery Workflows • Model Lifecycle Governance & Validation • Data Visualization (Plotly, Excel) • Cross-Functional Alignment (Finance, Risk, IT, Actuarial) • Methodology Standards & Peer Mentoring

EXPERIENCE

Moody's Analytics

Asst. Director - Modelling Services

Toronto, May 2023 - Present

Analytical Quality Assurance, Governance & Standards

- Holds delegated sign-off authority on valuation, sensitivity, and ALM analytics delivered to institutional client portfolios of \$5-25bn per engagement (~\$50bn+ cumulative), independently reviewing quantitative methodology, calibration, and cross-asset interactions before production release.
- Sits on the model governance committee, contributing to methodology review, documentation and benchmarking standards, and model-performance assessment across the lifecycle of client-delivered analytics.
- Acts as escalation point for client-critical analytical issues, interfacing with clients' Heads of Risk, and holds back outputs lacking mathematical or economic defensibility.

Analytics Solution Design & Data Engineering

- Led design and implementation of an enterprise multi-asset cash flow projection engine covering base, stress, and reverse-stress scenario simulation, giving clients forward-looking liquidity visibility.
- Architected configurable time-bucketed gap analytics (T+1 through multi-year) enabling funding optimization, refinancing risk assessment, and asset-allocation decisions.
- Re-engineered manual spreadsheet workflows into scalable Python analytics pipelines with embedded logging, validation, and auditability controls.

AI-Enabled Delivery & Executive Insight

- Built agentic AI development workflows using generative AI tooling (Claude Code, Cursor IDE) that automate code generation, validation scaffolding, anomaly detection, and documentation, reducing development cycle time an estimated 30-40% on comparable modules.
- Prepared analytical summaries for senior stakeholders on interest-rate exposure, scenario impacts, and balance-sheet sensitivities, translating quantitative output into decision-ready narratives.

Client Service Specialist

Toronto, May 2022 - May 2023

- Led onboarding and implementation for U.S. and Canadian pension funds, asset managers, and consulting firms migrating to the PFaroe DB (risk & ALM analytics) and PFaroe PM (portfolio management) platforms.
- Translated ambiguous investment-team requirements into scoped Product Owner development requests as technical liaison, advising on configuration and validating model outputs post-deployment.
- Contributed to migrating all assigned client accounts from the legacy Calypso environment to PFaroe PM.

Ernst & Young (EY)

Senior Consultant - IFRS & Financial Risk Transformation

Toronto, Sep 2021 - Apr 2022

- Delivered IFRS 17 and IFRS 9 technology-transformation programs for Canadian and international insurance clients, aligning reporting requirements with system implementation.
- Advised actuarial, IT, finance, and program-management stakeholders on standard adoption and contributed to governance documentation and regulatory-readiness processes.
- Developed IFRS 17 advisory product offerings and go-to-market collateral supporting practice growth, and coordinated cross-functional teams on milestone delivery.

Ortec Finance Canada

Consultant - Asset-Liability Management & Risk

Toronto, Feb 2019 - Sep 2021

- Delivered ALM and investment studies for Canadian and international pension funds and institutional investors, analysing funding ratios, duration mismatch, and long-term balance-sheet exposures.
- Built and interpreted stochastic economic scenario generators quantifying interest-rate and funding-volatility risk under base-case and stressed environments.
- Performed asset-only and asset-liability portfolio optimization on VaR and CVaR using Ortec's GLASS platform, with risk decomposition and near-optimal frontier analysis to test the robustness of recommendations.
- Presented study findings and strategic asset-allocation recommendations on-site to investment committees at pension-fund clients.
- Led onboarding and the ALM study for a three-plan university pension merger on a team of three, developing and validating the model capturing all Funding Policy dynamics.

EDUCATION & CREDENTIALS

- Chartered Financial Analyst (CFA) - CFA Institute, 2024
- MSc, Financial Modelling - Western University, 2018
- MSc, Chemical Engineering (Full Scholarship) - Western University, 2016
