SUMMARY

Manager, Finance Data Analytics & Insights candidate with ~7 years across pension and institutional investment analysis, valuation, risk, and reporting-transformation work. CFA charterholder holding delegated sign-off on valuation and sensitivity outputs for institutional portfolios of \$5-25bn per engagement, who re-engineered manual spreadsheet workflows into auditable Python analytics pipelines and translated institutional clients' investment requirements (including pension funds) into scoped platform solutions. Earlier delivered IFRS 17 and IFRS 9 reporting-transformation work at EY and pension ALM and LDI studies at Ortec Finance.

CORE SKILLS

Investment Analysis & Portfolio Risk Analytics • Regulatory & Financial Reporting Transformation (IFRS 17 / IFRS 9) • Management & Investment-Committee Reporting • Analytical Tool Development • Workflow & Analytics Automation (Python, Excel) • SQL (PostgreSQL) for Data Extraction & Analysis • Python - pandas, NumPy, SciPy • R & MATLAB (Intermediate, historical use) • Data Visualization (Plotly, matplotlib, Excel) • Valuation, Sensitivity & Scenario Analysis • Pension ALM, Funding Ratio & LDI Analytics • Cross-Functional Delivery & Requirements Scoping • Governance & Documentation Standards

EXPERIENCE

Moody's Analytics

Asst. Director - Modelling Services

Toronto, May 2023 - Present

Valuation, Risk & Portfolio Analytics for Institutional Clients

- Hold delegated sign-off authority on valuation, sensitivity, and ALM outputs delivered to institutional client portfolios of \$5-25bn per engagement (~\$50bn+ cumulative), independently reviewing curve construction, spread calibration, and cross-asset interactions before release.
- Review aggregation logic converting security-level exposures into portfolio-level risk metrics that feed downstream ALM, capital, and reporting processes for institutional and pension clients.
- Prepare analytical summaries and management reporting for senior stakeholders on interest-rate exposure, scenario impacts, and portfolio sensitivities, translating quantitative output into investment-committee-ready narratives.

Analytical Tool Development & Process Automation

- Re-engineered manual spreadsheet workflows into scalable Python analytics pipelines with embedded logging, validation, and auditability controls.
- Led design and implementation of an enterprise multi-asset cash flow projection engine supporting base, stress, and reverse-stress scenarios across multi-year horizons.
- Built agentic AI development workflows (Claude Code, Cursor IDE) automating code generation, validation scaffolding, anomaly detection, and documentation, reducing development cycle time an estimated 30-40% on comparable modules.

Governance, Documentation & Stakeholder Partnership

- Serve on the model governance committee, participating in methodology review, documentation and benchmarking standards, and model-performance assessment for client-delivered analytics.
- Act as escalation point for client-critical analytical issues, interfacing directly with clients' Heads of Risk and investment stakeholders, and escalating outputs lacking economic defensibility.

Client Service Specialist

Toronto, May 2022 - May 2023

- Led onboarding and implementation for U.S. and Canadian pension funds, asset managers, and consulting firms adopting PFaroe DB (risk & ALM analytics) and PFaroe PM (portfolio management).
- Translated investment-team requirements into scoped Product Owner requests for development, advised on asset, liability, and ALM configuration, and validated model outputs post-deployment.

- Contributed to the migration of all assigned client accounts from the legacy Calypso platform to PFaroe PM without loss of reporting continuity.

Ernst & Young (EY)

Senior Consultant - IFRS & Financial Risk

Toronto, Sep 2021 - Apr 2022

- Delivered IFRS 17 and IFRS 9 transformation projects for Canadian and international insurance clients, aligning regulatory requirements with system implementation and financial reporting frameworks.
- Coordinated cross-functional actuarial, finance, IT, risk, and program-management teams on milestone delivery, governance documentation, and regulatory-readiness materials.

Ortec Finance Canada

Consultant - Asset-Liability Management & Risk

Toronto, Feb 2019 - Sep 2021

- Delivered ALM studies for Canadian and international pension funds and institutional investors, analyzing funding ratios, duration mismatch, and long-term balance-sheet risk exposures.
- Performed asset-only and asset-liability (surplus) portfolio optimization on VaR and CVaR using Ortec's GLASS platform, with risk decomposition and attribution (contribution-to-risk, risk budgeting) and near-optimal frontier analysis to test allocation robustness.
- Built and interpreted stochastic economic scenario generators assessing interest-rate risk and funding volatility under base-case and stressed environments.
- Modelled pension-fund actuarial liabilities alongside all major investment-product types and economic variables, and conducted LDI analysis on duration alignment, return objectives, and liquidity.
- Led onboarding and the ALM study for a three-plan university pension merger, on a team of three developing and validating the model capturing all Funding Policy dynamics, duration, currency, inflation, and leverage overlays.
- Presented study findings and allocation recommendations to investment committees at Canadian pension-fund clients on-site.

EDUCATION & CREDENTIALS

- Chartered Financial Analyst (CFA) - CFA Institute, 2024
- MSc, Financial Modelling - Western University, 2018
- MSc, Chemical Engineering (Full Scholarship) - Western University, 2016
