Re: Senior Manager Investment Oversight – Scotiabank

Independent oversight of multi-asset investment mandates is what I do daily. At Moody's Analytics I hold delegated sign-off authority on the valuation, sensitivity, and portfolio outputs delivered to institutional mandates of \$5-25bn per engagement, and I contribute to methodology, documentation, and model-performance standards as a member of the model governance committee. That review discipline is the core of the Senior Manager, Investment Oversight mandate for 1832 Asset Management's product shelf, and I would like to be considered for the role.

Before Moody's I spent two and a half years at Ortec Finance as the analyst behind investment studies for Canadian and international pension funds and institutional investors: asset-only and surplus optimization on VaR and CVaR using Ortec's GLASS platform, risk decomposition and contribution-to-risk budgeting, SAA and TAA trade-offs stress-tested under stochastic scenarios, and LDI analysis. I presented those analyses on-site to investment committees, fielding questions on methodology and assumptions. At Moody's I have extended that into valuation and sensitivity review, validating derivatives pricing outputs across rates, FX, and inflation, reviewing aggregation from security level to portfolio-level metrics, and holding releases where results were mathematically defensible but economically unsupported. Periodic analysis packs and committee-ready narratives are the routine output of that work.

What draws me to this seat is its breadth: Canadian and international asset management under one oversight mandate, with direct accountability to senior management, the Investment Committee, and the Independent Review Committee. My oversight background is institutional and pension-led rather than retail fund, so the fund-specific and portfolio-advisor due-diligence layer is where I would ramp; the analytical review and committee-reporting muscle transfers directly, and I build my own reporting analytics in Python and Excel. I hold the CFA charter and dual MSc degrees in Financial Modelling and Chemical Engineering.

I am Toronto-based, available for interviews immediately, and can start approximately four weeks after offer acceptance. Thank you for your consideration.

Sincerely,
