Re: Aladdin Client Engagement FO Relationship Manager VP – BlackRock

Dear Hiring Team,

For four years at Moody's Analytics I have onboarded, configured, and validated the multi-asset portfolio and risk platform that competes most directly with Aladdin – and before that I sat on the client's side of the table as an ALM and portfolio consultant to pension funds and institutional investors. I would like to be considered for the Aladdin Client Engagement, Front Office Relationship Manager, Vice President role.

At the client-facing layer, I led onboarding and implementation for U.S. and Canadian pension funds, asset managers, and consulting firms moving onto PFaroe, migrated every assigned account off a legacy Calypso environment, and acted as the standing liaison between client investment teams and product owners – scoping their requirements into development work and validating outputs after deployment. At the analytics layer, I hold delegated sign-off authority on valuation, sensitivity, and portfolio risk outputs for institutional portfolios of \$5-25bn per engagement, and I am the escalation contact for clients' Heads of Risk when numbers need defending. Earlier, at Ortec Finance, I did the front-office work itself: asset-only and surplus portfolio optimization on VaR and CVaR, risk decomposition and attribution, and scenario analysis presented directly to pension investment committees.

What makes this seat the natural next step is the overlap between Aladdin's institutional client base and the book I have served across roughly seven years – pension plans, asset managers, and consultants whose portfolio management, risk, and reporting teams ask precisely the questions I have spent my career answering. I know how these relationships are earned: understand the client's investment problem first and the product roadmap second, then connect the two credibly enough that the feedback loop back to Product actually moves. I hold the CFA charter and dual MSc degrees from Western University, and work daily in Python and SQL.

I am available for interviews immediately and can start approximately four weeks after offer acceptance. My resume is attached; references available on request. Thank you for your time.

Sincerely,
