SUMMARY

Senior Manager, GRM Portfolio Risk Oversight, Business Financial Services candidate with ~7 years in portfolio risk analytics, stress testing, sensitivity analysis, and forward-looking scenario modelling for institutional portfolios. Holds delegated sign-off on valuation, sensitivity, and risk outputs across engagements of \$5-25bn (~\$50bn+ cumulative) at Moody's Analytics. Hands-on Python and SQL; VaR/CVaR optimization, risk decomposition, and Monte Carlo scenario generation at Ortec Finance. CFA charterholder, dual MSc in Financial Modelling and Chemical Engineering; translates complex quantitative output into committee-ready insight for senior risk and business leadership.

CORE SKILLS

Portfolio Risk Analytics & Oversight • Stress Testing, Scenario Analysis & Sensitivity Testing • VaR & CVaR (Expected Shortfall) • Monte Carlo & Statistical/Stochastic Modelling • Derivatives Valuation & Sensitivity Validation • Risk Decomposition & Attribution • Python (pandas, NumPy, SciPy) • SQL (PostgreSQL) • Data Visualization (Plotly, matplotlib) • Senior Leadership & Committee Reporting

EXPERIENCE

Moody's Analytics

Asst. Director - Modelling Services

Toronto, May 2023 - Present

Portfolio Risk Oversight & Senior Leadership Insight

- Holds delegated sign-off authority on valuation, sensitivity, and risk outputs for multi-asset institutional portfolios of \$5-25bn per engagement (~\$50bn+ cumulative), independently reviewing curve construction, spread calibration, and cross-asset interactions prior to production release.
- Prepared analytical summaries for senior stakeholders covering rate exposure, scenario impacts, and portfolio sensitivities, translating quantitative output into investment-committee-ready narratives.
- Escalated outputs lacking mathematical or economic defensibility and served as escalation point for client-critical analytical issues, interfacing with Heads of Risk and investment stakeholders.

Stress Testing, Scenario Analysis & Sensitivity Testing

- Led design and implementation of an enterprise multi-asset cash flow projection engine supporting base, stress, and reverse-stress scenarios, giving forward-looking visibility from T+1 through multi-year horizons.
- Embedded behavioral cash flow assumptions, prepayment logic, and macro stress overlays used in executive contingency planning.
- Oversaw duration and interest-rate sensitivity analysis under parallel and non-parallel rate shocks across institutional portfolios.
- Validated derivatives pricing outputs across rates, FX, and inflation, confirming consistency of sensitivities and scenario impacts at portfolio-level aggregates.

Risk Reporting & Analytics Tooling

- Re-engineered manual spreadsheet workflows into scalable Python analytics pipelines with embedded logging, validation, and auditability controls.
- Reviewed aggregation logic converting security-level exposures into portfolio-level risk metrics as a member of the model governance committee.
- Built agentic AI development workflows (Claude Code, Cursor IDE) automating code generation, validation scaffolding, and anomaly detection, cutting development cycle time an estimated 30-40% on comparable modules.

Client Service Specialist

Toronto, May 2022 - May 2023

- Translated investment-team requirements into structured analytic and development requests while onboarding U.S. and Canadian pension funds, asset managers, and consultants onto PFaroe DB (risk analytics) and PFaroe PM (portfolio management).
- Migrated all assigned client accounts from the legacy Calypso platform to PFaroe PM, validating model outputs post-deployment.

Ernst & Young (EY)**Senior Consultant - IFRS & Financial Risk Transformation**

Toronto, Sep 2021 - Apr 2022

- Delivered IFRS 17 and IFRS 9 transformation projects for Canadian and international insurance clients, aligning regulatory requirements with system implementation and financial-reporting frameworks.
- Coordinated actuarial, finance, IT, and risk functions on milestone delivery and contributed to governance documentation and regulatory-readiness processes.

Ortec Finance Canada**Consultant - Asset-Liability Management & Risk**

Toronto, Feb 2019 - Sep 2021

- Performed asset-only and surplus portfolio optimization on VaR and CVaR using Ortec's GLASS platform, with risk decomposition, contribution-to-risk attribution, and near-optimal frontier analysis to test the robustness of allocation recommendations.
- Built and interpreted stochastic economic scenario generators, applying statistical and Monte Carlo techniques to assess interest-rate exposure and funding volatility under base-case and stressed environments.
- Analyzed funding ratios, duration mismatch, and long-term balance-sheet exposures across portfolio studies for Canadian and international pension funds and institutional investors.
- Advised clients on strategic and tactical asset allocation trade-offs through stress testing and sensitivity analysis.
- Presented study findings and recommendations to investment committees at Canadian pension-fund clients on site.

EDUCATION & CREDENTIALS

- Chartered Financial Analyst (CFA) - CFA Institute, 2024
- MSc, Financial Modelling - Western University, 2018
- MSc, Chemical Engineering (Full Scholarship) - Western University, 2016
