SUMMARY

Market Risk Coverage Lead - Vice President candidate with ~7 years across fixed income and multi-asset market risk analytics. Holds delegated sign-off authority on valuation and sensitivity outputs for institutional portfolios of \$5-25bn per engagement, with hands-on VaR/CVaR portfolio optimization, stress scenario construction, and rates, foreign exchange and inflation derivatives validation. Model governance committee member, presenting scenario impacts and interest-rate exposure to Heads of Risk and investment committees. CFA charterholder; dual MSc.

CORE SKILLS

Market Risk Analytics (Fixed Income, Rates & FX) • Value at Risk (VaR) & Conditional VaR (CVaR) • Stress Testing & Stress Scenario Construction • Duration, Key-Rate & Convexity Sensitivities • Risk Decomposition, Attribution & Risk Budgeting • Portfolio Optimization & Risk-Return Trade-offs • Market Risk Model Methodology Review & Governance • Macroeconomic Scenario Generation & Projections • Derivatives Valuation & Sensitivity Validation • Independent Review & Constructive Challenge • Senior Stakeholder & Investment Committee Reporting • Python, SQL, Advanced Excel; VBA (working knowledge)

EXPERIENCE

Moody's Analytics

Asst. Director - Modelling Services

Toronto, May 2023 - Present

Fixed Income & Multi-Asset Market Risk Analytics

- Holds delegated sign-off authority on valuation, sensitivity, and ALM outputs for multi-asset institutional portfolios of \$5-25bn per engagement (\$50bn+ cumulative), independently reviewing curve construction, spread calibration, and cross-asset interactions before production release.
- Validated derivatives pricing outputs across rates, foreign exchange (FX), and inflation, confirming consistency of sensitivities and scenario impacts at portfolio-level aggregates.
- Oversaw interest-rate risk and duration analysis under parallel and non-parallel rate shocks across multi-asset institutional books.
- Reviewed aggregation logic converting security-level exposures into portfolio-level risk metrics feeding downstream balance-sheet and capital processes.

Model Methodology Review, Governance & Escalation

- Serves on the model governance committee, contributing to methodology review, benchmarking and documentation standards, and model-performance assessment for client-delivered analytics.
- Escalated outputs lacking mathematical or economic defensibility and acted as escalation point for client-critical analytical issues, interfacing directly with clients' Heads of Risk and investment stakeholders.

Stress Scenarios, Macro Overlays & Senior Reporting

- Led design and implementation of an enterprise multi-asset cash-flow projection engine supporting base, stress, and reverse-stress scenarios across multi-year horizons.
- Embedded behavioral cash-flow assumptions, prepayment logic, and macroeconomic stress overlays into scenario construction.
- Prepared analytical summaries for senior stakeholders on interest-rate exposure, scenario impacts, and portfolio sensitivities, translating quantitative output into committee-ready narratives.

Process & Technology Improvement

- Re-engineered manual spreadsheet workflows into scalable Python analytics pipelines with embedded logging, validation, and auditability controls.
- Deployed agentic AI development workflows (Claude Code, Cursor) automating code generation, validation scaffolding, and anomaly detection, cutting development cycle time an estimated 30-40% on comparable modules.

Client Service Specialist

Toronto, May 2022 - May 2023

- Onboarded U.S. and Canadian pension funds, asset managers, and consulting firms onto PFaroe DB (risk & ALM analytics) and PFaroe PM (portfolio management), validating model outputs post-deployment and translating investment-team requirements into development requests.

Ernst & Young (EY)**Senior Consultant - Financial Risk Transformation**

Toronto, Sep 2021 - Apr 2022

- Delivered IFRS 17 and IFRS 9 transformation projects for Canadian and international insurance clients, aligning regulatory requirements with system implementation and financial-reporting frameworks.
- Coordinated across actuarial, finance, IT, risk, and program-management teams on milestone delivery, contributing to governance documentation and regulatory-readiness processes.

Ortec Finance Canada**Consultant - Asset-Liability Management & Risk**

Toronto, Feb 2019 - Sep 2021

- Performed asset-only and asset-liability (surplus) portfolio optimization on Value at Risk (VaR) and Conditional VaR (CVaR) using Ortec's GLASS platform, testing allocation robustness across near-optimal frontier portfolios.
- Executed risk decomposition and attribution (contribution-to-risk, risk budgeting) to isolate the drivers of portfolio and funding-ratio volatility.
- Built and interpreted stochastic economic scenario generators assessing interest-rate risk and funding volatility under base-case and stressed macroeconomic environments.
- Conducted cash flow, liquidity, and hedging analysis across interest-rate, inflation, and currency risk for international institutional clients.
- Advised clients on strategic and tactical asset allocation trade-offs through stress testing and sensitivity analysis, presenting findings to pension-fund investment committees on-site.

EDUCATION & CREDENTIALS

- Chartered Financial Analyst (CFA) - CFA Institute, 2024
- MSc, Financial Modelling - Western University, 2018
- MSc, Chemical Engineering (Full Scholarship) - Western University, 2016
