SUMMARY

Quantitative risk and model-governance professional with ~7 years across market and balance-sheet risk, derivatives valuation, and independent model review, aligned to an Associate Director, Global Risk Analytics mandate. Holds delegated sign-off authority on valuation, sensitivity, and ALM outputs for multi-asset institutional portfolios (\$5–25bn per engagement; \$50bn+ cumulative) at Moody's Analytics, independently reviewing and validating pricing and scenario model outputs across rates, FX, and inflation. Strong in Python, MATLAB, SQL, stochastic / Monte Carlo simulation, and statistics, with applied knowledge of Basel-aligned market-risk and stress-testing frameworks. CFA charterholder, dual MSc.

CORE SKILLS

Market Risk & Balance-Sheet Risk · Derivatives Valuation – Rates, FX, Inflation · Stress Testing, Scenario & Reverse-Stress Analysis · Quantitative Model Development & Methodology · Stochastic, Monte Carlo & Statistical Modelling · Model Governance & Independent Validation · Python, MATLAB, SQL & Excel · Yield Curve Construction & Calibration · Risk Reporting & Executive / Stakeholder Communication

EXPERIENCE

Moody's Analytics – Asset Management & Buy-Side Solutions

Asst. Director – Modelling Services | Toronto, May 2023 – Present

Valuation, Model Review & Risk Oversight

- Hold delegated sign-off authority for valuation, sensitivity, and ALM outputs across multi-asset institutional portfolios (\$5–25bn per engagement; \$50bn+ cumulative), independently reviewing curve construction, spread calibration, and cross-asset interactions before release.
- Independently review and validate derivatives pricing and sensitivity outputs across rates, FX, and inflation, ensuring sensitivities and scenario impacts are consistent at portfolio-level aggregates.
- Review aggregation logic converting security-level exposures into portfolio-level risk metrics feeding downstream ALM and capital processes.
- Oversee interest-rate and market exposure under parallel and non-parallel shock scenarios, aligned with IRRBB and Basel Committee market-risk frameworks.
- Document model assumptions, limitations, and testing results to support internal validation and approval, consistent with model-governance documentation standards.

Scenario, Stress & Liquidity Analytics

- Lead the design and ongoing development of an enterprise multi-asset cash flow projection and scenario engine (base, stress, reverse-stress), applicable to CCAR-style forward-looking stress assessment.
- Architect configurable time-bucketed liquidity gap analytics (T+1 through multi-year) supporting funding, refinancing, and capital-adequacy assessment.
- Develop tools to monitor model performance, assumptions, and limitations on an ongoing basis, investigating and remediating issues surfaced through monitoring or independent validation.
- Re-engineer manual spreadsheet workflows into auditable Python pipelines and build agentic AI workflows (Claude Code, Cursor IDE) that cut development and validation cycle time ~30–40%.

Governance & Stakeholder Communication

- Operate within a formal model-governance framework, reviewing assumptions and stress methodologies and escalating outputs lacking mathematical or economic defensibility.
- Explain complex modelling concepts and scenario impacts to senior management and clients' Heads of Risk, translating quantitative outputs into decision-ready narratives.

Client Service Specialist – ALM & Risk Analytics | Toronto, May 2022 – May 2023

- Led onboarding and implementation for U.S. and Canadian pension funds, asset managers, and consulting firms migrating to the PFaroe analytics platform.

- Served as technical liaison between client investment teams and product owners, translating requirements into development requests and validating model outputs post-deployment.
- Contributed to the successful migration of all assigned client accounts from the legacy Calypso platform to the PFaroe PM platform.

Ernst & Young (EY)

Senior Consultant – IFRS & Financial Risk Transformation | Toronto, Sep 2021 – Apr 2022

- Delivered IFRS 17 and IFRS 9 transformation projects for Canadian and international insurance clients, aligning regulatory requirements with model and system implementation.
- Advised actuarial, finance, IT, and risk functions; contributed to governance documentation and regulatory-readiness processes for financial institutions.

Ortec Finance Canada

Senior Consultant – Asset-Liability Management & Risk | Toronto, Feb 2019 – Sep 2021

- Delivered ALM studies for pension funds and institutional investors, analyzing funding ratios, duration mismatch, and long-term balance-sheet risk exposures.
- Built and interpreted stochastic economic scenario generators (Monte Carlo) to assess interest-rate risk and funding volatility under base-case and stressed environments.
- Conducted liability-driven investment (LDI) analysis, evaluating trade-offs between return objectives, duration alignment, and liquidity considerations.
- Presented findings to investment committees and senior stakeholders to support strategic allocation decisions.

EDUCATION & CREDENTIALS

- Chartered Financial Analyst (CFA) – CFA Institute, 2024
- MSc, Financial Modelling – Western University, 2018
- MSc, Chemical Engineering (Full Scholarship) – Western University, 2016
